STATE CLEARINGHOUSE

NEWSLETTER

January 16-31, 2007

STATE CLEARINGHOUSE NEWSLETTER

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Newsletter summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **January 16-31, 2007.**

CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613
Fax: (916) 323-3018
e-mail: state.clearinghouse@opr.ca.gov
website: www.opr.ca.gov/clearinghouse/clearinghouse.shtml

Questions regarding federal grant notices should be directed to **Sheila Brown.**

Questions regarding processing of environmental documents should be directed to:

Scott Morgan
Senior Planner

CLEARINGHOUSE MAILING ADDRESS

Please do not use our street address (1400 Tenth Street, Room 212) for mailing purposes. The correct mailing address is:

STATE CLEARINGHOUSE
P.O. BOX 3044
SACRAMENTO, CA 95812-3044

INFORMATION AVAILABLE ON-LINE

The 2001 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

MEMORANDUM

DATE: February 13, 2007
TO: State Agency CEQA and Intergovernmental Review Coordinators
FROM: Scott Morgan, Senior Planner
SUBJECT: Distribution of Environmental Documents in CD-ROM Format

The State Clearinghouse has received an increasing number of requests from local and state lead agencies to distribute CEQA documents to state reviewing agencies in an electronic format, typically CD-ROM. The most common reason for these requests is to reduce cost. CD-ROMs are cheaper for the lead agency to reproduce and mail, and cheaper for the State Clearinghouse to distribute, especially in the case of multi-volume documents.

The State Clearinghouse has distributed EIR's and EIS's in CD-ROM format for state agency review and comment since August 1, 2003. Based on our experience with those documents, a survey conducted of state reviewing agencies and the potential cost savings to local and state agencies, we are extending this policy to other environmental documents including Negative Declarations, Mitigated Negative Declarations and Environmental Assessments. The State Clearinghouse will accept environmental documents under the following terms:

- CEQA Lead agencies may provide copies of draft environmental documents to the State Clearinghouse for state agency review in an electronic format. The document must be on a CD-ROM in a common file format such as Word or Acrobat.
- Lead agencies must provide fifteen (15) copies of the CD-ROM to the State Clearinghouse. In addition, each CD-ROM must be accompanied by 15 printed copies of the DEIR summary (as described in CEQA Guidelines §15123), executive summary, or introduction section of a Negative Declaration or Mitigated Negative Declaration. The printed summary allows both the State Clearinghouse and agency CEQA coordinators to distribute the documents quickly without the use of a computer.
- Final environmental documents may be provided in CD-ROM format without a printed summary. Distribution of the final documents is optional under CEQA.
- Federal lead agencies may send electronic copies of environmental documents to the State Clearinghouse in the same manner described for CEQA lead agencies. Distribution of NEPA documents to state agencies through the State Clearinghouse is encouraged pursuant to Presidential Executive Order 12372 and NEPA §102 (42 USC §4332)
- All notices of preparation must continue to be provided in printed format.
- Please provide one Notice of Completion Form with all submittals.

If your agency has difficulty downloading and reviewing any environmental documents please contact:

Scott Morgan, Senior Planner
916-445-0613
scott.morgan@opr.ca.gov

Thank you for your cooperation in the CEQA review process.

ENVIRONMENTAL DOCUMENT FILINGS WITH THE STATE CLEARINGHOUSE 1999 through 2006

All CEQA documents filed with the State Clearinghouse are available for viewing on the Internet at <http://www.ceqanet.ca.gov/>

2007012061	General Plan Amendment Application No. 2007-01 - Agricultural Element Update Stanislaus County --Stanislaus Agricultural Element Update of the Stanislaus County General Plan. The current element was adopted in April of 1992. The purpose of the Agricultural Element is to promote and protect local agriculture through the adoption of policies designed to achieve three main goals: (1) strengthen the agricultural sector of our economy, (2) conserve our agricultural lands for agricultural use, and (3) protect the natural resources to sustain agriculture in Stanislaus County.	CON	01/30/2007
2004022076	Marin County Draft 2005 Countywide Plan Update Marin County --Marin Marin County Draft 2005 Countywide Plan Update.	EIR	03/01/2007
2006092038	2007 Amendment to the Redevelopment Plan for the Hughson Redevelopment Project Hughson Redevelopment Agency Hughson--Stanislaus The 2007 Amendment proposes to add territory ("Added Territory") to the area included within the Hughson Redevelopment Project. The primary objective of the 2007 Amendment is to provide for a variety of possible redevelopment activities pursuant to the California Community Redevelopment Law (CCRL; Health and Safety Code Section 33000, et seq.), within the Added Territory, and to help further similar redevelopment activities within the project. Such activities are designed to help remedy deficient physical and economic conditions in the Added Territory and the project. To help achieve this objective, Hughson Redevelopment Agency activities could include, but not necessarily be limited to, the following: provision of affordable housing, construction and/or rehabilitation of structures; infrastructure upgrades for wastewater, drainage, water, and circulation systems, community facility improvements, and other upgrades. While not proposed as specific projects at this time, these actions are possible activities that may be undertaken within the Added Territory over the 30-year effective life of the Redevelopment Plan, as proposed to be amended by the 2007 Amendment.	EIR	03/01/2007
1995083033	September Ranch Subdivision Monterey County The proposed project involves the subdivision of 891 acres into 73 market rate residential lots, 15 units of inclusionary housing, and a 20.2 acre lot for the existing equestrian facility; 800.9 acres is proposed as open space. Other appurtenant facilities and uses would include separate systems for the distribution of potable water, water tanks for fire suppression, a sewage collection and treatment system, waste water treatment system, drainage system, internal road system, common open space, tract sales office and security gate.	FIN	
2005031014	Mixed Use Solana Beach Train Station Solana Beach, City of Solana Beach--San Diego The proposed project is composed of three separate development projects: (1) construction of the North County Transit District (NCTD) parking facility to provide parking for the Solana Beach Train Station and the region; (2) construction of an integrated, mixed-use, transit-oriented development involving office,	FIN

2007011055	City of Delano Arsenic Mitigation Project Delano, City of Delano--Kern The construction of arsenic removal facilities of the City of Delano's existing water wells. Funding project will be sought from the California Department of Health Services Safe Drinking Water State Revolving Fund. The City of Delano currently operates eleven water wells to supply groundwater to its municipal customers. These water wells, (City wells 4, 12, 14, 19, 20-26) supply practically 100% of all the drinking and domestic water to the City. In 2005 the United States Environmental Protection Agency adopted a maximum contaminant level (MCL) for arsenic in municipal water supplies of 10 parts per billion (ppb); the previous MCL was 50 ppb.	MND	02/14/2007
2007011062	City of McFarland Housing Element Update 2002-2007 McFarland, City of McFarland--Kern The project reviewed and evaluated the previous housing element; discusses about the future housing need and potential issues facing City of McFarland; identifies goals and objectives for year 2002-2007; proposes specific programs to address those issues.	MND	02/15/2007
2007012070	UC Davis Medical Center Stockton Boulevard Research Center Project University of California, Regents of the Sacramento--Sacramento The project is the interior remodel of approximately 109,000 square feet (sf) Building 41 (Stockton Boulevard Warehouse), construction of a utility enclosure adjacent to the building, and utility connections to the UCDCM Central Plant. The proposed "Stockton Boulevard Research Center" would consist of research labs, support facilities, and some administrative space. At full occupancy, which would be phased over several years as research programs are funded, there would be up approximately 192 UCDCM and private researchers and staff. Research activities would involve the use of chemical and radioactive materials in small	MND	02/14/2007

The excavation and reclamation will be on 1,127 acres of the 1,945 acre site and will be carried out in three phases. Each phase consists of multiple sites within the project area to permit the applicant to blend aggregate with different characteristics to create various products. The mined material is located close to the surface under a thin layer of topsoil so that the deepest mined areas will be approximately thirty feet in depth. This project is adjacent to an existing quarry. The excavated material from this project will be processed (crushed, screened, sorted, and stockpiled) at the existing facilities on the adjacent site.</p>	NOP	02/14/2007
2007012069	<p>Creekside Memorial Park Cemetery, County File #LP05-2096 Contra Costa County San Ramon--Contra Costa</p> <p>If approved, the proposed project would include the following development which would occur on approximately 59 acres of the 221-acre property. There will be an upper garden area consisting of 13 acres and a lower garden area consisting of 46 acres. In addition to this development there will be a reservation of 9.0 acres set aside for the exiting residence and 1.0 acre set aside for a possible fire station.</p>	NOP	02/14/2007
2007012071	<p>Feather Creek Specific Plan Yuba County Marysville, Wheatland--Yuba</p> <p>The project would involve establishment of the Feather Creek Specific Plan, which includes residential development, preservation of open space, construction of parks and an elementary school, and a small commercial development. The Feather Creek Specific Plan would provide policies, guidelines, development standards, and concepts to guide growth of the 700-acre project area. The five elements addressed in the Specific Plan include: Land Use and Design; Circulation; Parks and Open Space; Resource Management; and Public Facilities and Services.</p>	NOP	02/15/2007
2007012074	<p>New Central Health Services Center Corrections and Rehabilitation, Department of --Marin</p> <p>The project site is located within the San Quentin State Prison within the main prison walls. The project proposes to demolish the existing 54,100 gross square foot (GSF) Building #22 and replace it with a new five-story 115,000 (GSF) new Central Health Services Center (CHSC) building. The new five-story CHSC building will support the delivery of improved health, mental and dental care services to inmates residing at San Quentin.</p> <p>The building will exceed its current height, but will not exceed the existing building height of the adjacent North Block Building.</p> <p>If Feasible, a dungeon built in the 1850's and located in the north end of the building would be preserved and incorporated into the proposed CHSC.</p> <p>This new CHSC building will support the current San Quentin inmate population,</p>	NOP	02/14/2007

	142 feet in length and would be constructed to Siskiyou County's Plate III standard. Plate III standards consist of a 18-foot wide travel lane, two 2-foot wide shoulders and a 6-inch aggregate base. The proposed road would be constructed within a 40-foot wide road and utility easement. Two 12-inch culverts are to be constructed under the proposed road, which would hydrologically link the isolated wetlands located on either side of the proposed road.		
2007012065	Nick S. and Patricia M. Satariano (TPM-06-15) Siskiyou County Planning Department Mount Shasta--Siskiyou The applicants are requesting Tentative Parcel Map approval to create three parcels of 2.6 acres, 2.77 acres, and 4.11 acres in size from two existing parcels totaling 9.48 acres. Sewage disposal for the resultant parcels would be provided by an on-site septic system. Water services would be provided by on-site domestic wells. The applicants are proposing to construct a 400-foot access road over an existing asphalt driveway that currently serves one existing single-family residence (not a part of the proposed project). The proposed access road would serve Proposed Parcel 1 and Parcel 2. Proposed Parcel 3 is developed with an existing residence and is currently served by an existing privately maintained road. The proposed access road would be constructed to a modified Plate III standard, which includes an 18-foot wide travel lane, two 2-foot wide shoulders, two 1.5-foot wide drainage cuts, and a 6-inch aggregate base. The access road would be located within an existing easement for ingress/egress and utilities. The privately maintained roadway would encroach onto North Old Stage Road (County Road No. 3L01). A 60-foot hammer-head turnaround is proposed to be constructed at the terminus.	Neg	02/14/2007
2007012066	Klamath Sprig and Honker Club (Z-06-06) Siskiyou County Planning Department Tulelake--Siskiyou The applicants are requesting Zone Change approval to reclassify 16.7 acres from the AG-2-B-40 (Non-Prime Agricultural, 40 acre minimum parcel size) to the PD (Planned Development) zoning district to permit commercial mini-storage facilities with a recreational vehicle and boat storage area.	Neg	02/14/2007
2007012067	David A. and Robin Bennett Siskiyou County Planning Department --Siskiyou The applicants request Tentative Parcel Map approval to divide a 10.11-acre parcel, creating a 5.05-acre parcel and a 5.06-acre parcel. Parcel A is undeveloped, Parcel B is being developed with a single-family dwelling and accessory uses. The proposed Tentative Parcel Map would allow for the construction of one additional single-family dwelling with rural residential agricultural uses. The proposed parcels would be consistent with zoning. Access is provided by Kidder Creek Road, a county-maintained road.	Neg	02/14/2007
2007012068	David Abbott/Derry & Ilene M. Converse Siskiyou County Planning Department --Siskiyou The applicants request Zone Change approval to rezone portions of two parcels. Area A - This area to be rezoned is under the ownership of Converse and would be rezoned from PD (Planned Development) to C-U (Neighborhood Commercial), and is 0.3 acres in size. The proposed changes in zoning would facilitate a	Neg	02/14/2007

	which established potential developable areas for each parcel based on the County's Hillside Development Criteria. The Use Permit is required for development proposed on land zoned PC. The PC Zone designation allows for varied lot sizes and the consideration of alternative road standards.		
2006122063	Removal of Invasive Non-native Plants and Revegetation with Native Plants on Two Ranches in the Napa Valley Napa County Resource Conservation District Yountville--Napa The purpose of this project is to restore native plant communities along waterways on two ranches in Napa Valley. Non-native invasive vegetation including eucalyptus, acacia, tree of heaven, black locust, giant reed, Himalayan blackberry, fennel, and blue periwinkle will be removed from the sites starting in winter 2007. California native vegetation including big leaf maple, California buckeye, Oregon ash, N. California black walnut, California bay laurel, valley oak, coast live oak, toyon, coffeeberry, and California wild rose will replace the non-native invasive species and planting will be initiated in winter 2008.	NOD	
2007019008	Cahuilla II Reservoir Coachella Valley Water District La Quinta--Riverside The Department is issuing a Lake and Streambed Alteration Agreement for the project proponent who proposes the construction of a single, 12-million gallon steel water reservoir situated on or adjacent to the foothills of the Santa Rosa Mountains. The project also involves the extension of an access road and water transmission line. The project will result in construction of a stormwater intercept system, of which a portion will be constructed within and adjacent to a portion of an unnamed blue line stream with a limited drainage area emanating from the adjoining foothills. This intercept system is comprised of a stormwater inlet structure that connects with two 48-inch diameter drain pipe transitions to a 54-inch diameter drain pipe located along the eastern portion of the reservoir. This extends to a point of discharge through an energy dissipater and into the downstream portion of the drainage. On-site and slope runoff will be collected and conveyed through two 36-inch diameter laterals to a 48-inch diameter mainline pipe. The project will permanently impact approximately 1.5 acres of the streambed. The proponent shall mitigate the permanent impact to the 1.5 acres of desert dry wash woodland at 3:1 through the acquisition of or the placement of a conservation easement on 4.5 acres of desert dry wash woodland habitat.	NOD	
2007019009	Streambed Alteration Agreement 1600-2006-0659/3 1-06-135 MEN THP Fish & Game #3 --Mendocino Nine activities are proposed that have the potential to substantially divert or obstruct the natural flow or substantially change the stream bed, channel, or bank of a watercourse (California Fish and Game Code, Section 1602). The activities involve six culvert replacements on Class II watercourse crossings along an unimproved road, two Class II watercourse unimproved road crossing abandonments, and one water diversion into tank on a Class II watercourse for dust abatement, road construction and maintenance, and fire suppression. 2007018082	<p>Highway Improvements SR 70 Caltrans #2 --Plumas</p> <p>The California Department of Transportation (Caltrans) proposes a highway improvement project on State Route (SR) 70 in Plumas County from approximately 0.63 mile to 0.03 mile west of Humbug Creek. The pavement on this section of SR 70 currently varies in width from 21 feet to 24 feet (10.5 to 12 foot traffic lanes) with unimproved shoulders. Pavement edges are deterioration due to vehicles driving on or too close to the pavement edge. The proposed project will entail saw cutting the existing catch point. The new pavement will provide standard 12-foot wide traffic lanes and additional pavement, one to two feet in width, to provide lateral support. The project will generate approximately 580 cubic yards of excess material consisting of asphalt concrete waste and dirt. All work will be confined to the highway right of way. No trees will be removed and no jurisdictional surface waters will be affected by the project. Caltrans performed an environmental evaluation consisting of a review of resource records and databases, consultation and coordination with applicable agencies and individuals, and field surveys of the project limits. No sensitive threatened or endangered species were found in the project area. There are no listed hazardous waste sites within the project limits. No historic properties will be affected by the equipment, a temporary environmentally sensitive area (ESA) fence will be installed prior to the commencement of work.</p>	NOE	
2007018083	<p>Buckhorn Summit Improve Safety Caltrans #2 --Shasta</p> <p>Caltrans proposes to improve safety at the Buckhorn summit on SR 299 by realigning curve radii. The total accident rate is 4.5 times higher than the statewide average. The project realigns four curves, widens shoulders, and improves drainage. Approximately 5.5 acres of new right of way will be required. Excavation will have 0.75:1 cut slopes; embankment will have 1.5:1 fill slopes. Slopes will be renegotiated, and other erosion control measures will be implemented, permits will be required. Noxious weed control will be enforced by agreement between Caltrans and BLM. Due to the Migratory Bird Treat Act, a tree removal window is in effect beginning September 16 and ending March 15 in the year prior to construction. An optional disposal site is designated at PM 3.7 on SR 299. This categorical exemption-programmatic categorical exclusion replaces previous 02-397900 determined 10-25-2005.</p>	NOE	
2007018084	<p>Replace Corrugated Metal Pipes Caltrans #2 --Lassen</p> <p>Using only state funds the California Department of Transportation will replace two existing corrugated metal pipes (CMP) with a single-cell reinforced concrete box (RCB) and widen the shoulders bringing the shoulder width and clear recovery zone to current design standards.</p>	NOE

2007018096	Chemical Waste Management, Inc. - Kettleman Hills Facility Reissuance of Temporary Authorization to Allow Implementation of Landfill B-19 Class II/III Waste Fi Toxic Substances Control, Department of Kettleman, Unincorporated--Kings Kettleman Hills Facility (KHF) is a Class I hazardous waste treatment, storage and disposal facility and a Class II/III disposal facility. The facility is an approximately 1,600-acre site, of which 499 acres are currently permitted for Class 1 hazardous waste and TSCA-regulated PCB waste and Class II/III waste operations. On January 10, 2007, pursuant to 22 CCR 66270.42(e)(4)(C)2, DTSC approved and reissued the June 15, 2006 temporary authorization for an additional term of 180 days. The request for a reissuance of the temporary authorization makes no changes to the June 15, 2006 temporary authorization, which allows KHF to change the Landfill B-19 Class II/III waste fill side slope from 4 units of length horizontal to 1 unit of length vertical (4H:1V) to 2.5 units of length horizontal to 1 unit of length vertical (2.5H:1V) as proposed in the addendum to the approved Landfill Unit B-19 Closure Plan. A Class 3 permit modification for a permitted authorization has been submitted for review. The approved closure plan will continue to be followed, with the exceptions of having more "daylight" final cover area, changes in the southern portion of the stability berm configuration, and initiation of 2.5H:1V slope change in Class II/III waste fill. The applicable standards in chapter 14 of division 4.5, title 22, CCR will be followed. These changes will be incorporated into the closure construction certification report.	NOE

	environmental protection/restoration of the Park. In combination with the Historic Properties Management Plan and Master EIR, the Master Plan provides fundamental planning guidance for development decisions and long-term management of the recreation area in a manner that would complement and preserve the Park's unique character.		
2005081129	Elementary School #24 and Middle School #7 Moreno Valley Unified School District Moreno Valley--Riverside The elementary school would have seats for a maximum of 900 students in grades kindergarten through 5 on a 10-acre site. The main structures would include five classroom buildings and a multi-purpose room, an administrative building, a library, and kindergarten classrooms. Other facilities would include two surface parking lots with student loading zone and bus loading zone, a linear turf athletic field along the western boundary, hardcourt play area, kindergarten play area, and a lunch shelter. Vehicle access would be provided via a new street along the eastern site boundary.	EIR	03/02/2007
2007011060	The 2006 Klamath River Restoration Grant Program in Humboldt and Siskiyou Counties Fish & Game #1 --Humboldt, Siskiyou This project will use grant funds approved by the California Legislature to initiate activities that are designed to restore salmon and steelhead habitat in and access to cold water tributaries of the Klamath River from Iron Gate Dam to the Pacific Ocean. Past land management practices within California's watersheds combined with natural events have impacted high quality aquatic and riparian habitats and limited the ability of fish to survive and successfully reproduce in the Klamath River and its tributaries. These rivers historically produced large populations of salmon and steelhead.	MND	02/15/2007
2007011061	Aura Circle - GPA 05-06/ZC 05-03/HMPP 06-12/CT 03-10/SDP 05-05/HDP 03-05/CDP 03-02 Carlsbad, City of Carlsbad--San Diego A General Plan Amendment, Zone Change, Local Coastal Program Amendment, Habitat Management Plan Permit, Tentative Subdivision Map, Site Development Plan, Hillside Development Permit, and Coastal Development Permit are required for the proposed 11-lot subdivision. The subdivision will result in 9 residential lots and 2 open space parcels. Single-family residences are proposed for development on each of the lots. Open Space Lots 10 and 11 comprise 12.363 acres (82% of the project area). The open space lots will have new General Plan Land Use and Zoning designations of OS (Open Space). An LCP amendment is required to reflect the new OS designations on the LCP Land Use Plan and Zoning Maps and a Coastal Development Permit is required for the proposed subdivision and residential construction.	MND	02/15/2007

	developed as affordable rental housing of one to four bedroom units. A density bonus, under the new County Ordinance regulations which permit a higher density for affordable housing, has been requested by the applicant. A general plan amendment to change the existing land use category from Major Commercial to Category 3 Medium Density Residential (12-22 units/acre) is proposed. A zone change from M-1 (Light Manufacturing) to C-3-DP (Unlimited Commercial-Development Program) is also proposed, along with a conditional use permit for the development program. The proposed number of units requested exceed the Category 3 density threshold. The applicant requests a reduction in parking requirements under the density bonus regulations. A total of 15 parking spaces each are required for the health and child care facilities, and 151 spaces are required for the apartment complex. Twenty-eight parking spaces will be provided for the health and child care facility, and 91 spaces are proposed for the apartment complex for a total of 119 parking spaces in lieu of the required 181 spaces. A section of the proposed parking lot is located in the City of Compton. In the event that the City of Compton does not permit tandem parking spaces, the total number of parking spaces will be reduced by seven spaces to 112 parking spaces. With the exception of the southern end of the proposed parking lot, the project is located within the East Compton Community Standards District (CSD) of unincorporated Los Angeles County.		
2007012073	Recycled Water System Expansion, Sonoma County, California Bodega Bay Public Utility District --Sonoma The Bodega Bay Public Utility (BBPUD) is proposing to expand their recycled water system. The expansion would include additional irrigation and increased storage capacity for wet weather years to accommodate growth, as well as compensate for a recent reduction in golf course irrigation. The expansion will include construction of one recycled water storage pond (approximately 16 million gallons) and additional irrigation lines. This Initial Study focuses on assessment of potential environmental impacts to the areas proposed for the necessary expansion of the recycled water irrigation system, as well as the ongoing storage and land disposal of biosolids.	MND	02/15/2007
2007011064	Gorman Post Ranch/TR062053/RENTV200500006/ ROAKT200500010/RCUPT200500016 Los Angeles County Department of Regional Planning Gorman--Los Angeles Application for TR062053 to develop 531 single family residential lots on 422.05 acres; two residential ranch lots on 306.50 acres; 18 open space lots on 1874.52 acres; six debris basin lots on 8.13 acres; one water tank site on 7.13 acres; one sewer pump lot on 0.89 acre; five private and future street lots on 99.13 acres; and improvements to Gorman Post Road over 7.03 acres. Application also includes a CUP request for Hillside Management, density controlled development and SEA; and an OTP to remove 2,375 and encroach upon 1,677 oak trees. Golden Valley Municipal Water District (GVMWD) in Gorman will provide water via onsite wells. Sewage disposal will utilize interconnected sewer and pump system onsite and a proposed off-site wastewater treatment plant that will be constructed and operated by GVMWD. Approximately 13,000,000 cubic yards of cut is proposed which will be balanced onsite. There will be an additional 70,000 cubic yards of cut at the offsite wastewater treatment plant which will be balanced at that site.	NOP	02/15/2007

2007011068	Westgate Specific Plan Placentia, City of Placentia--Orange The purpose of the Westgate Specific Plan is to redevelop and/or revitalize the planning area to create a pedestrian-friendly, transit-oriented district. The project includes development proposals, street improvements and other infrastructure improvements, as well as form-based development standards and zoning. The project will eventually provide approximately 1,560 dwelling units, 550,000 square feet of commercial space, and 85,000 square feet of civic space.	NOP	02/15/2007
2007011069	Seaside Main Gate Project Seaside, City of Seaside--Monterey The project proposes a Specific Plan and Tentative Subdivision Map to allow development of an approximately 552,500 square foot, open-air retail center at an average floor area ratio (FAR) of 0.24. The project includes a 180-room hotel located above ground-level retail space. The project also proposes a spa and resort conference center that will include a 26,000 square foot spa facility, a 12,000 square foot conference center, and 24 resort style casita buildings housing 30 hotel rooms. Specific tenants for the retail center are not finalized at this time. The project includes a department store, three large retail tenants, and numerous medium and small retailers. Retail uses could include department stores, bookstores, sporting goods stores, houseware stores, clothing stores, specialty retailers, and restaurants. Structure parking is proposed to support the department store, spa/conference center, and hotel. Required entitlements for this project will include, but not be limited to, approval of the Specific Plan, Tentative Subdivision Map, Disposition and Development Agreement, etc. to allow the proposed development.	NOP	02/15/2007
2007012075	Gilbert Property Project Oakley, City of Oakley--Contra Costa The proposed 120-acre Gilbert Property project site consists of agricultural land located in the City of Oakley, Contra Costa County, California. The project includes the development of approximately 510 dwelling units on +/-120 acres. In addition to the residential lots, the project includes trails, park, levees, a storm water detention pond, as well as the infrastructure improvements necessary to accommodate the new development.	NOP	02/15/2007

Neg	02/15/2007
1989010086	Irvine Desalter Project and South Irvine Brine Line Project U.S. Bureau of Reclamation Irvine--ORANGE The Irvine Desalter Project (IDP) is a joint groundwater quality restoration project by the Orange County Water District (OCWD) and the Irvine Ranch Water District (IRWD) to clean up the groundwater in the vicinity of the former Marine Air Corps Station (MCAS) El Toro base. The natural geology and past agricultural drainage have resulted in undesirable levels of total dissolved solids (TDS) or salts and nitrates in the local groundwater. Separately, past chemical disposal and waste handling practices at the former MCAS have caused seepage of volatile organic compounds (VOCs) such as trichloroethylene (TCE) into both the shallow and principal aquifers on and adjacent to the former MCAS. By pumping and treating groundwater containing elevated salts and nitrates, the IDP will largely prevent the migration of salts and nitrates from the Irvine Sub-basin into the main Orange County groundwater basin, which is located just west of Irvine. The project will also prevent VOC-contaminated groundwater from spreading into the main Orange County aquifer. By providing reliable new sources of local potable and non-potable waters, the IDP will reduce dependency on non-local water sources. The project consists of three separate systems of wells and pipelines and three separate water treatment plant facilities: the Potable Treatment of Plant (PTP), SGU treatment facilities (non-potable), and Central Treatment Plant (CTP, non-potable). Each system operates independently, with separate wells, pipelines, and treatment facilities. The only component of the IDP under the authority of the California Department of Health Services permit amendment is the Potable Treatment Plant.	NOD	
2004062061	Auburn Water Treatment Plant Expansion Project Placer County Water Agency Auburn--Placer The proposed project would consist of an upgrade and expansion of the Auburn Water Treatment Plant (WTP) and associated facilities to serve growth in the Auburn service area and to provide improved reliability and more dependable service. The Auburn WTP presently has a maximum capacity of about 6 million gallons per day (mgd). PCWA would expand the WTP facilities to allow for ultimate system buildout and 14 mgd. This expansion would occur in multiple phases. Phase I would include all improvements and installation of facilities capable of treating 8 mgd of water. Future phases would add modular units within the interior of the phase I treatment facility, as demand increases, to treat an additional 6 mgd, increasing the total plant capacity to 14 mgd. The project also would include construction of a parking area and implementation of wildland fire	NOD

	<p>To support the proposed food processing operations, the project would include the construction of an anhydrous ammonia refrigeration system, two evaporative coolers, water storage tank, buffer tank, dilution tank, a 2,640 gallon liquid oxygen tank, a 2,640 gallon carbon dioxide tank, a 4,000 gallon nitrogen tank, and a wastewater treatment unit. The anhydrous ammonia refrigeration system would store 5,000 lbs of ammonia solution and would be compliant with the latest standards set forth by the American Society of Heating, Refrigerating, and Air-Conditioning Engineers and Uniform Fire Code Article 80.</p> <p>There would be two diesel emergency generators installed on-site. The larger generator (Generator #1) has a power rating of 2,323 brake horsepower (BHP) or 1,732 kW and Generator #2 is 1,120 BHP or 835 kW. Each generator would be operated up to one hour per week for testing purposes, and the testing would not occur on the same day. In addition, the diesel generators would require the installation of a 2,000-gallon underground storage tank for the storage of diesel fuel.</p> <p>The facility would incorporate 15 dock doors for shipping and receiving produce. The maximum number of inbound and outbound trucks would be approximately 80 per day (40 trucks). The proposed food processing facility would employ 350 individuals in two shifts, with 200 persons in the day shift and 150 persons in the night shift. Jobs range from human resources, information technology, finance, drivers, new product development, machine operators, technical engineers, line leaders, and semi skilled and skilled processing employees.</p>		
2006111094	<p>Plot Plan Application PP 06-04; Project Sunfield March Joint Powers Authority --Riverside</p> <p>Project Sunfield consists of the development of an approximately 179,500 square foot tilt-up concrete building for food processing, office use, and a refrigerated warehouse at 21842 Opportunity Way. The food processing use would involve the cutting, grinding, and packaging of meat products. All products will arrive boxed. Raw material would be a combination of boneless vacuum packed primal cuts and whole chickens. This raw material would be sliced, diced or ground to produce finished retail "shelf ready" products, which would be delivered directly to wholesale customers.</p> <p>The proposed site formerly accommodated portions of the Arnold Heights military housing tract. This housing was determined to be unsuitable for habitation by both the United States Air Force and the March Joint Powers Authority. The housing was abated of asbestos containing materials and demolished in conformance with the Focused EIR for the Arnold Heights Demolition Project (SCH# 2005081074).</p> <p>The proposed food processing facility would employ over 400 individuals in three shifts, with approximately 225 people in the day shift and 175 people in the night shift, along with office and administration staff. The third staff would be a cleaning operation (totaling approximately 10 people). Jobs range from human resources, information technology, finance, drivers, new product development, machine operators, technical engineers, line leaders, and semi skilled and skilled processing employees.</p>	NOD

	To support the proposed food processing operations, the project would include the construction of an anhydrous ammonia refrigeration system. The project includes one diesel emergency generator and one associated underground diesel fuel tank. The maximum number of inbound and outbound trucks would be approximately 10 to 12 trucks per day, equating to a maximum of 24 truck trips per day.		
2006112039	<p>ALS User Support Building University of California, Berkeley Berkeley--Alameda</p> <p>The project will construct a three-story, approximately 30,000 gross square-foot (gsf)/17,416 net square foot (nsf) User Support Building (USB). The USB would be approximately 48 feet in height and is limited to three standard-height laboratory/office floor levels. The site is currently occupied by existing Building 10, a two-story approximately 16,038 gsf structure constructed in 1944, which would be demolished as a part of the project. The USB would be used for the precision component assembly of experimental equipment, two-story beamline equipment staging, a potential figure beamline extension from the ALS building, chemical and biological prep laboratories, chemical storage, and office space. Office/Office Support space would account for 10,005 nsf and Lab/Lab Support would account for 7,411 nsf. The remaining 13,000 nsf of the USB would consist of lesser used areas in the building including, but not limited to, elevator shafts, ductwork shafts, and stairwells. At peak capacity, the project would accommodate approximately 85 occupants, however, because they would be relocated from other buildings on the LBNL site the project would not result in a substantial net population increase at LBNL.</p>	NOD	
2006112063	<p>Biomedical Sciences Facility University of California, Santa Cruz Santa Cruz--Santa Cruz</p> <p>The project will construct and operate a 92,300-gross square feet Biomedical Sciences Facility in the academic core area of the UC Santa Cruz campus. The proposed facility, which would include four stories above ground and a basement rodent vivarium, would provide interdisciplinary wet laboratory space, core specialized facilities and faculty offices for scientists from the departments of Molecular, Cell and Developmental Biology, Chemistry and Biochemistry, Environmental Toxicology, and Biomolecular Engineering, with concentrations in research in health and medical issues. The facility would not include classroom space. The new building would be located on a 1.5-acre site in the Science Hill area of the main campus at UC Santa Cruz, immediately north of the Sciences and Engineering Library and east of the Physical Sciences Building, on the south side of McLaughlin Drive, at the present location of a campus parking lot. Vehicle access to the building would be provided via McLaughlin Drive and an existing service drive that also accesses the Science and Engineering Library.</p>	NOD

	the proposed construction, approximately 194 parking spaces are proposed.		
2007012077	Willow Creek Residential Project Plumas County Planning Department Portola--Plumas The proposed project is intended to be an all-season recreational residential development. The project includes the construction of 210 residential units. The project site includes 277 acres zoned as Residential (S-3) and 40 acres zoned as General Forest. The project would incorporate a variety of recreational components which may include a recreation center near the site entrance with interior exercise facilities and an exterior swimming pool/spa with barbeque facilities. Additional recreational activities located along the main entry road may include a 9-hole putting course, a trout pond for fly fishing, an ice skating pond, and a large grassed playfield area for soccer, softball, touch football and/or other lawn activities. The primary site access would be provided from Highway 70 near the current unpaved access road. Some improvements may be necessary to Highway 70 to accommodate the site entrance. Water for the proposed development would be provided from groundwater wells to be installed on the site. A package wastewater treatment system would be installed on the site to process the project's wastewater.	NOP	02/16/2007
2007011071	Water System Rehabilitation Cutler Public Utility District --Tulare Many portions of the District's existing water distribution system are 50 years old. The pipelines are subject to leaks and are undersized. The project will replace portions of the existing distribution system, valves, fire hydrants, water services, paving, and appurtenances.	Neg	02/16/2007
2007011072	The Station at Fillmore Fillmore, City of Santa Paula--Ventura The proposed project involves the construction of approximately 26,364 square feet of commercial development on a vacant 1.8-acre parcel. The building would be two stories in height and would include 14,933 square feet on the first floor and 11,429 square feet on the second floor. The proposed project would include 11 commercial retail spaces on the first floor.	Neg	02/16/2007
2007011076	Brandenburg Butters Large Lot and Small Lot TTM Project Coachella, City of Coachella--Riverside The Brandenburg Butters Tentative Tract Map includes the development of up to 842 residential units at various densities, a 6-acre park, multiple landscape corridors, and a 16.34-acre site for the development of up to 244 multi-family units or an elementary school. Access to the site would be provided via Avenue 50 and new road connections to Polk Street. Access would also be provided from State Route 86 via a new road connection. The entitlements for the project include approval of a Large Lot Tentative Tract Map to create four large lots on the project site and one remainder parcel, and a Small Lot Tentative Tract Map for the uses outlined above. 	<p>the boat launch. Construction of the additional parking spaces entails minor grading, base preparation, paving, and installation of a concrete curb and entrance gate. Install new pre-fabricated, CXT-style concrete vault restroom that is 21 feet wide by 21 feet long including perimeter walkways. Equipment staging and storage areas are on existing graded gravel or paved surfaces. The project will adhere to conditions provided by the California Department of Parks and Recreation biologist. A Department of Fish and Game Streambed Alteration Agreement, Section 404 Permit from the U.S. Army Corps of Engineers, and Section 401 Clean Water Certification from the State Water Resources Control Board will be obtained. Silt fencing and other erosion control measures will be implemented as required. Two elderberry shrubs, the habitat for the Valley Elderberry Longhorn Beetle (VELB), are located adjacent to the the existing parking area to be repaved. To prevent impacts to VELB, no project activities will occur within 100 feet of the plants during mating and emergence between May 1 and July 15, staging areas will be at least 20 feet from the shrubs, and dust control measures will be implemented during construction. To avoid impacts to nesting birds, no tree or foliage will occur between March 15 and August 15. Temporary orange fencing will be placed around and fifteen feet outside the foliage drip line of an oak tree adjacent to the project area in order to protect the tree from parking lot construction activities. A biologist from the California Department of Parks and Recreation will instruct the project manager and construction crew about the potential for Western pond turtles in the construction area and how to safely remove them. In addition, construction vehicles will be limited to five miles per hour within the construction area to avoid turtles. If a Western pond turtle is found in the construction area, the biologist will be notified.</p>		
2007018112	<p>Lease of New Office Space Rehabilitation, Department of Sacramento--Sacramento</p> <p>The California Department of Rehabilitation proposes to lease approximately 4,200 square feet of new office space. The space would house approximately 20 staff. Approximately 10 to 100 clients would be seen weekly using approximately 18 parking spaces. This office will be used for the purpose of counseling disabled clients re-entering the job market. Public transit is available within 1/4 mile of the site.</p>	NOE	
2007018114	<p>Whittemore Grove SOD Prevention Parks and Recreation, Department of --Humboldt</p> <p>Reduce the spread of the organism that causes Sudden Oak Death (SOD) in Whittemore Grove, John B. Dewitt Redwoods State Reserve by improving drainage on the road and in the parking lot and installing an educational bulletin board which will inform the public about how to prevent the spread of SOD. To improve drainage, construct a ditch from the road edge through existing road over burden and sediment to the unnamed creek located just west of the road. The ditch dimensions are 36" wide, 24" deep, and 150' long. Add rock gravel to an existing parking area to raise the elevation (approximately 6" lift) of the parking area and prevent pooling of water. Install a bulletin board with subsurface wooden footings for interpretive information. Install a barrier of boulders around the parking lot to prevent motor vehicles from entering the grove of trees from the parking lot. Construction vehicles and equipment will be staged on existing gravel or paved surfaces and will be cleaned at an appropriate washing facility immediately after leaving the project area. Native plant material within the project</p>	NOE

area will be salvaged, saved, and used for revegetation after construction is complete. Measures and conditions have been incorporated into the project design to ensure that construction will not affect northern spotted owl, marbled murrelet, or cultural resources.

2007018115	<p>Install Culvert Across Connector Trail Parks and Recreation, Department of --Contra Costa</p> <p>Install a new 12-inch diameter by 6 foot long high-density polyethylene (HDPE) culvert pipe across a popular connector trail located in the Mitchell Canyon Day Use Area. This trail connects the upper parking lot and Bruce Lee Trail to the Mitchell Canyon Fire Road. The project area is situated at a point on the connector trail, where the trail crosses an ephemeral swale that has suffered from erosion. Excavate the soil material used for the trail to a depth of approximately 24 inches for culvert placement. After fitting the culvert pipe, install filter fabric and rock armorment as necessary to protect the two inflow and outflow points of the culvert from erosion. Replace soil material excavated from the trail. Culvert installation repairs the connector trail and is situated within the existing trail alignment. Equipment staging and storage areas are located on existing graded gravel and paved surfaces. There are no known cultural resources in the project area.</p>	NOE

Documents Received on Friday, January 19, 2007

2004122132	<p>Villages of San Jacinto San Jacinto, City of San Jacinto--Riverside</p> <p>The proposed project will consist of a suburban development including residential, commercial, business park, public facility and open space uses. Residential land uses would be located in the northwestern and central portions of the project site. Commercial development would be focused on the southeast corner of the project site. Business park development would be focused on the southwestern corner of the project site. One elementary school and one high school are planned in the northeastern portion of the site. Should these sites not be ultimately purchased and developed by the San Jacinto Unified School District, they could be developed with residential land uses. A total of 100.7 acres of the site will be reserved for open space uses including four neighborhood parks, a greenbelt system, three lakes and landscape easements. A community center/clubhouse will be located in the central portion of the site. Sanderson Avenue and Odell Avenue would serve as the primary access points for the project.</p>	EIR	03/05/2007
2006082042	<p>Toscana Subdivision Santa Rosa, City of Santa Rosa--Sonoma</p> <p>The proposed project would develop at least seven parcels for a total of 243 single-family detached homes, in three phases, with a 29.1-acre conservation area. The project calls for two home types to be constructed on the site. Of the proposed homes, 169 would be accessed primarily from rear alleys, while the remaining 74 would be conventional homes with garage access facing the street. The proposed alley entry homes would be three to four bedrooms and range in</p>	EIR	03/05/2007

	size from 1,985 square feet (sq. ft.) to 2,115 sq. ft., exclusive of porches and garages. The proposal would also include 36 alley entry Below Market Rate three bedroom units of 1,345 sq. ft. to satisfy the City Housing Allocation Plan requirements for providing affordable housing, with 15% of units offered. The conventional, front entry homes would be four to five bedrooms and range in size from 2,715 sq. ft. to 3,072 sq. ft., exclusive of porches and garages. Lot sizes range from 2,823 sq. ft. to 10,191 sq. ft. The average lot size is 3,936 sq. ft.		
2005092025	Branciforte Creek Residential Santa Cruz, City of Santa Cruz--Santa Cruz The project consists of a Planned Development, Tentative Subdivision Map, and Design Permit application for creation of 44 lots and development of 37 residential units. Six lots will be sold, but no development plans are included in this proposal for these six lots (Lots 38-43). Access to the project site will be provided via new roadway that will cross the site and provide access off of Market Street and off Isabel Drive.	FIN	
2007011079	Helen Lamb by Don Ward Kern County Planning Department Ridgecrest--Kern (a) A change in zone classification from E (10) RS [with E (2 1/2) RS in suspense pending a final map] to E (2 1/2) RS District on 19.57 acres; (b) a Tentative Parcel Map to create four residential lots and a designated remainder. The project site consists of two parcels totaling 19.57 acres that are currently developed with a single-family residence. The requested action includes a zone change to permit the existing zoning now in suspense of 2 1/2 acres to be utilized with a parcel map and a tentative parcel map that will result in the subdivision of the property into four parcels ranging in size from 2.58 acres to 2.71 acres and a 9.82-acre designated remainder. Access to the site is from Bowman Road and South Lumill Street. Water supply and sewage disposal for the proposed development would be by Indian Wells Valley Water District and by individual septic systems, respectively. Site access would be from East Bowman Road and South Lumill Street, which are designated respectively as arterial and collector alignments of Kern County Circulation Element.	MND	02/20/2007
2007011080	Karl's Hardware by Hal McDermott Kern County Planning Department --Kern (1) An amendment to the Rosamond Specific Plan to allow a change in map code designation from 5.3 to 6.2; (2) a change in zone classification from E (2 1/2) to C-2 PD or a more restrictive district. Intent of the change in map code designation and zone district is to facilitate expansion of an existing hardware store in the Rosamond area at a new location. As proposed, the new facility would entail a 19,600 sq. ft. hardware store, a 20,000 sq. ft. lumberyard, a 7,700 sq. ft. nursery, a 7,700 sq. ft. rental yard, encompassed by a six-foot high block wall and provisions for a 206-space parking lot. 	teacher workroom, and custodial facilities. The proposed project would continue to serve students in the LAUSD attendance area.		
2007012080	Vallejo Crossroads - Gas Station and Retail Center Vallejo, City of Vallejo--Solano The proposed Vallejo Crossroads commercial project is located approximately one half mile north of State Highway 37 and on the east side of State Highway 29. The project is subject to a Major Conditional Use Permit. The project includes a 12 Pump refueling facility and 2,500 square foot convenience store, 900 square foot carwash, 16,250 square feet of retail space and a 3,500 square foot quick service restaurant with a drive through. The project site is approximately three acres.	MND	03/05/2007
2005061143	Riverview Offices Project Del Mar, City of Del Mar--San Diego The proposed project consists of the construction of two, irregularly-shaped, two-story commercial office buildings totaling 23,293 square feet with associated parking, landscaping, access and utilities. The proposed project would provide 83 on-site parking spaces, two new driveways (the main access from San Dieguito Drive and the other an emergency access only from Jimmy Durante Boulevard), native landscaping, and hardscape areas surrounding the buildings.	NOP	02/20/2007
2007011077	Fresno Biosolids Project Fresno, City of Fresno--Fresno Transport of biosolids generated at Regional Wastewater Reclamation Facility in Fresno, Fresno County, CA to McCarthy Family Farms Biosolids Treatment Site in Lost Hills, Kern County, CA for composting, treatment, and land application. The City is currently proposing to enter into a contract with McCarthy to transport and recycle a portion of the City's biosolids currently being handled by McCarthy. McCarthy was deemed the only responsive and responsible bidder to the City's Request for Proposal (RFP). The result of this project is that the current biosolids operation would remain unchanged.	NOP	02/20/2007
2007011078	General Plan Amendment 01-06, Rezone 01-06, Tentative Tract Map 17862 Yucca Valley, City of Yucca Valley--San Bernardino GPA and Rezone to increase density from one unit/5 acres to 3.5 units per acre. Tract Map to subdivide 63.4 acres into 107 single family lots.	Neg	02/20/2007
2007012081	Wehmeyer/McMartin Enterprises Minor Subdivision San Mateo County Redwood City--San Mateo The applicant has applied for a minor subdivision of an 10,668 sq. ft. parcel. The net size of the two proposed parcels will be 5,330 sq. ft. (Parcel A) and 5,338 sq. ft. (Parcel B). Access for both parcels will be directly from Sequoia Avenue. Water will be supplied by California Water Service via an existing water line serving the project site. The Fair Oaks Sewer Maintenance District will provide sewer service to the site. The applicant proposes to demolish the existing dwelling and detached garage and construct two new single-family residences on the proposed parcels.	Neg	02/20/2007

2005112038	<p>Draft EIR, adoption of the Citrus Ranch Specific Plan, a General Plan Amendment, Pre-Zoning, change in the City's Sphere of Influence boundary, and Annexation to the City of Indio.</p> <p>500 Capitol Mall Sacramento, City of Sacramento--Sacramento</p> <p>The project includes the development of a 24-story (13th floor omitted), 396-foot-tall high-rise building, consisting of 467,942 gross square feet of office space, 27,124 gross square feet of retail space, 264,353 gross square feet of parking garage area, and a total of 794 parking spaces for a total building area of 759,419 square feet. The project would include retail uses on the ground floor, and a restaurant on two penthouse floors. Entitlements include:</p> <ul style="list-style-type: none"> - Certification of the EIR; - Adopt Mitigation Monitoring Plan; - Approval of the Design Review request to construct 25 story office structure, 396 feet in height at tallest point. The project includes 467,942 s.f. of office, 27,124 s.f. of retail, and 264,353 s.f. of garage and basement. 794 off-street parking spaces will also be provided. The new structure will replace an existing 155,180 square foot building, to be demolished; and - Special Permit for a major project over 75,000 gross square feet in the Central Business District (C-3-SPD) zone. 	NOD	
2005122130	<p>Fulton Avenue Development Project Sacramento, City of Sacramento--Sacramento</p> <p>The proposed project includes a remediation component and a development component. The following work would be conducted for the remediation: (1) removal and disposal of clay pigeon debris; (2) approximately two feet of contaminated soil from Parcel A and a small amount of soil from an area north of the 20-acre site would be consolidated onto Parcel B; (3) clean fill would be spread over the contaminated soils on Parcel B and overlain with an asphalt cap; and (4) clean fill would be imported to fill the void resulting from removal of the clay pigeons and contaminated soil and bring the site up to grade. The development component includes an approximately 90,000 square foot automobile dealership on the northern portion of Parcel A. Another 90,000 square feet of commercial development is proposed for the southern portion for either another auto dealership or other automotive-related use. The remainder of Parcel A would be paved for vehicle parking and display. The following development entitlements are necessary:</p> <ul style="list-style-type: none"> - General Plan Amendment to re-designate the project site from Parks/Recreation/Open Space to Heavy Commercial; - Rezone of the project site from R-1 to Heavy Commercial (C-4); - Approval of a Tentative Parcel Map to divide the approximately 456-acre parcel into two parcels of 10.8 acres and 6.7 acres, including a 2.5-acre right of way for the Fulton Avenue extension, as well as a 436.1-acre remainder lot; - Establishment of a Planned Unit Development (PUD) with Schematic Plan and PUD Guidelines; and - Three subdivision modifications for the extension of Fulton Avenue. 2006101091	Agreement between the Department of Water Resources and Westlands Water District for Wheeling Central Valley Project Water to Semitropic Water Storage District Westlands Water District --Fresno, Kings, Kern Delivery of up to 50,000 acre-feet of WWD's allocated CVP supplies during the 2006-2007 water year. The up to 50,000 acre-feet of WWD allocated CVP water supply proposed for this temporary diversion and storage is currently stored in San Luis Reservoir and is scheduled for delivery to WWD prior to May 31, 2007. Up to 50,000 acre-feet of the WWD supply would be conveyed via the San Luis Canal and California Aqueduct to Semitropic's turnout in Reach 10A of the California Aqueduct and/or at KCWA's turnouts in Reach 12E. Return of the water supply is anticipated to occur within the next five to seven years, during the next water supply shortage. At that time, the exchanged water would be made available through Semitropic's SWP Table A allocation, through an exchange of CVP water supply, or by pumping Semitropic groundwater into the California Aqueduct as an exchange for SWP Table A water.	NOD	
2006112045	UC Davis Health and Wellness Center University of California, Davis Davis--Yolo The project will construct and operate a three-story 75,000 square foot Health and Wellness Center to provide a new medical facility for UC Davis students. The new building will provide routine medical treatment, counseling, and physical therapy services for UC Davis students living on and off campus. The new building will be located on the central campus at UC Davis west of the Activities and Recreation Center on the west side of La Rue Road and south of Parking Lot 35. Vehicle access to the building will be provided via Parking Lot 35 which is accessed from Orchard Road. The approximately two-acre site is currently used for recreational basketball and as a plant nursery by the UC Davis Arboretum. These uses will be relocated to other portions of the central campus as part of the proposed project. The existing student health center buildings located south of Russell Boulevard and west of California Avenue will be reused for academic or administrative purposes.	NOD

	The dataset will include wind speed and wind shear measurements taken at heights relevant to modern wind turbines in key Renewable Portfolio Standard (RPS)-critical locations.		
2007018116	CMS Replacement Caltrans #3 South Lake Tahoe--El Dorado This project proposes to replace the changeable message sign (CMS) in order to display current winter driving conditions to the traveling public. The current scope of the project consists of removing the existing support structure, placing a new CMS and support structure, placing a new control cabinet, and minimal trenching in order to power the CMS. All work will be performed within Caltrans right-of-way.	NOE	
2007018117	Exchange of Property and Dedication of Right-of-Way (Paseo) Merced Union High School District Merced--Merced Agreement between Merced Union High School District and Merced Paseo, LLC pursuant to which District will convey 1436 square feet of the Bellevue Ranch high school site to Paseo in exchange for Paseo's agreement to cause the dedication of a Right-of-Way and construction of a southbound right hand turn lane on Barclay Avenue as it approaches Bellevue Road.	NOE	
2007018118	Gold Ridge RCD Americano Creek Watershed Gully Stabilization Gold Ridge Resource Conservation District (GRRCD) Petaluma--Sonoma This project consists of the stabilization of two 2000 ft. long gullies after the removal of buried tires that were placed in the gullies for erosion control. The two gullies drain an area of 100 acres. Using regional hydrologic data, the flow expected from a 100 year storm would exceed 50 cubic feet per second. The upper half of both gullies have an average slope of 12%; the lower half 8%. Figuring the channel dimensions, the 100 year flow of 50 cubic feet per second, and soil texture; the maximum slope for a lined channel would be 8%. Grade stabilization measures would need to be taken on slopes greater than 8%. Compacted earth fill and a series of rock grade stabilization structures, will be installed in parts of the gullies that exceed 8%. 1,120' will be treated by this method in gully "A" and 890' in gully "B". Thirty rock structures will require a total of 2,750 cubic yards of rock, 4' diameter or less. Additionally, 5,400 cubic yards of compacted earth fill are required. The channel in between grade stabilization structures will be lined with 2-6" cobble, requiring 1,800 yards. The flatter part of the gullies below the grade stabilization structures will be lined with a coir erosion control blanket, requiring 32,000 sq. ft. All disturbed areas not covered by rock, cobble, or erosion control blanket will be seeded with a native seed blend, fertilized and mulched.	NOE	
2007018119	Conditional Use Permit P06-04 (Angler's Marine) Santee, City of Santee--San Diego The application is to establish the sales of boats and related supplies and accessories in conjunction with an established boat showroom and repair facility using 8,746 square feet within an existing 32,800 square foot industrial building located on a 2.13 acre lot. The site is developed with parking, fencing and landscaping within the IL - Light Industrial zone. The proposed project represents	NOE

2007018122	Five-Year Coordinated Water Operations Agreement with Kern County Water Agency Metropolitan Water District of Southern California Los Angeles, City of--Los Angeles The Metropolitan Water District of Southern California (Metropolitan) proposes to enter into a five-year coordinated water operations agreement with Kern County Water Agency (KCWA). Under the Agreement, Metropolitan would have the option to deliver up to 50,000 acre-feet of its State Water Project (SWP) Table A supplies annually to KCWA during the summer months to offset KCWA's groundwater pumping requirements. In exchange, Metropolitan would receive a like amount of high-quality water from KCWA in the fall and winter months. The Agreement would also allow Metropolitan to schedule the return water in a future year, if desirable, and includes protections to ensure the water is returned, and that it is of acceptable quality. Metropolitan and KCWA would each pay its actual costs for conveying and pumping the water, but neither party would be required to pay the other a fee or any additional costs for the exchange. This no cost, one-for-one exchange would benefit KCWA by shifting groundwater pumping from the summer to the fall and winter months when energy costs are lower. Metropolitan would benefit by improving the quality of water it receives from the California Aqueduct by scheduling the return water during periods of elevated bromide and total organic carbon levels in its SWP supplies.	NOE

the drain. Damaged fencing will be repaired and revegetation will occur at the edge of the freeway shoulder. The project is proposed to begin in April 2007, and will conclude September 2007. All work will be conducted in the channel with no water flow, therefore diversion will not be needed. No work will be performed in or near the Rio Hondo or its banks. There is currently an existing dirt path between the bank of the Rio Hondo and the project site for access. The Caltrans footprint will not encroach upon this dirt path. Equipment needed to complete the project includes an asphalt dike paver, concrete pump truck, 2-axle dump truck, loader with backhoe, and hydraulic excavator. The drain area to be replaced is 0.19 acre or 963.95 linear feet. The size of the new drain (i.e., the maximum width is 8.86 feet and the height is 2 feet) does not exceed that of the existing drain; therefore there will be no additional permanent impacts to the Department's jurisdiction. The drain is currently concrete lined. The repair materials include concrete (220 cubic yards), rock slope protection (12 cubic yards), sandbags (7.4 cubic yards), and corrugated metal pipe (36 feet). The Operator shall not impact more than 0.19 acre of existing concrete-lined channel. The Operator will not create additional impacts. No native riparian habitat shall be impacted as a result of the proposed project impacts by removing weeds and exotic species within the native habitat in the project vicinity along Rio Hondo Channel for a total of 0.38 acre at a ratio of 2:1 compensation.

2000102046	Lawrence Berkeley National Laboratory 2006 Long-Range Development Plan University of California Berkeley, Oakland--Alameda The Ernest O. Lawrence Berkeley National Laboratory (Berkeley Lab or LBNL) proposes a 20-year program of development to address its scientific research needs. The proposed project consists of a Long Range Development Plan for Lawrence Berkeley National Laboratory as well as construction, development, and demolition projects and Laboratory operational, research, and maintenance activities pursuant thereto through the planning year 2025. The project site occupies 202 acres in the Oakland/Berkeley Hills. The baseline assessment of building space used in this Draft EIR was established in July 2003. The program anticipates a projected net increase in occupied space of up to 660,000 gross square feet, an increase of up to 1,000 in population, and up to 500 additional parking spaces onsite.	EIR	03/07/2007
2002022004	Silicon Valley Rapid Transit Corridor -- BART Extension to Milpitas, San Jose and Santa Clara Santa Clara Valley Transportation Authority Milpitas, San Jose, Santa Clara--Santa Clara, Alameda The BART Extension Project would begin at the planned BART Warm Springs Station (to be implemented by 2013) in Fremont and proceed on the former Union Pacific Railroad right-of-way through Milpitas to near Las Plumas Avenue in San Jose. The extension would then descend into a subway tunnel, continue through downtown San Jose, and terminate at the grade in Santa Clara near the Caltrain Station. The total length of the alignment would be 16.1 miles. Six stations are	EIR	03/08/2007

	proposed with an additional future station in Milpitas. Passenger service for the BART Extension Project would start in 2016, assuming funding is available.		
2006102076	UC Davis CNPRC 2007 Research Laboratory Project University of California Davis--Yolo UC Davis proposes to construct five buildings and provide new utility connections at the UC Davis California National Primate Research Center (CNPRC). The first building would encompass 10,000 gross square feet (gsf) [6,700 assignable square feet (asf)] and would include 1,200 asf of office and office support space, 5,300 asf of laboratory space and laboratory support space, and 200 asf of building support space. The proposed laboratory space would include approximately 1,100 asf would be designed as a biosafety level 3 laboratory suite for research involving potentially infectious agents.	EIR	03/07/2007
2007011085	Tourney Place Santa Clarita, City of Santa Clarita--Los Angeles This is a request for approval of a Zone Change (ZC), General Plan Amendment (GPA), Conditional Use Permit (CUP), and Tentative Parcel Map (TPM) in order to construct a 50,814 square-foot professional office building in the "Lower Tourney" area (APN 2861-001-105) and to subdivide the airspace of the proposed and existing buildings located in the "Upper Tourney" (APN 2861-061-035, 044) and "Lower Tourney" areas. The project site is located at the Tourney Place Campus on the west side of Tourney Road, 1/4 mile south of Magic Mountain Parkway and is zoned Business Park (BP), Visitor Serving/Resort (VSR), and Open Space (OS). The approval of a ZC and GPA is required for the construction and operation of an office building on property that is currently zoned OS. The applicant is requesting approval of a ZC and GPA to change the zoning designation of APN 2861-001-105 from OS to BP and APN 2861-061-035 from BP/VSR to BP/VSR/OS. The proposed zoning realignment would result in a net gain in OS zoning of 157%. The approval of a CUP is required for the construction of a three-story, 44'-9" tall office building that exceeds 35 feet in height. The proposed development includes 256 parking spaces and enhanced landscaping. The approval of a TPM is required for the proposed subdivision of airspace of existing buildings #3-5 in the "Upper Tourney" area, proposed building #6 in the "Lower Tourney" area, and the surface parking lots on the project site for a total of 8 lots. 2007012087	Irish Beach Water Project: Renewal of Appropriative Permits 21902 and 24364 Irish Beach Water District --Mendocino Irish Beach Water District requests renewals of permitted appropriative water rights to Irish Gulch and Mallo Pass Creek. Proposed diversion rates are 121 GPM=0.292 CFS to a maximum of 195 AFA from each creek. Beneficial Use is domestic and municipal for the Irish each subdivision granted in 1967. Point of Use is the seaside Irish Beach community nestled between two streams on the coastal plain in southern Mendocino County. Proposed diversion season is January 1 through December 31 annually. Requested diversions amount to <5% Estimated Annual Runoff to existing and proposed Points of Diversion.	Neg	02/20/2007
2003121062	Date Ave. & "A" St. Improvement Project & Amend. to the Circulation Elem. of the General Plan Porterville, City of Porterville--Tulare The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement pursuant to Section 1602 of the Fish and Game Code to the project applicant, Baldomero Rodriguez, City of Porterville Department of Public Works, 291 N. Main Street, Porterville, CA 93257. The applicant proposes to install a stormwater outfall in the bank of the Tule River to provide erosion control at a discharge point from a storm drain. No equipment will enter the waterway during construction activities, and no water diversion will occur. Restoration will include grading and replanting disturbed areas with native vegetation.	NOD	
2004051039	Robertson Ranch Master Plan-EIR 03-03 Carlsbad, City of Carlsbad--San Diego Request for approval of a Floodplain Special Use Permit (SUP) and Hillside Development Permit (HDP) for grading of the Robertson Ranch Park Site in accordance with the terms of the Parkland Agreement and Robertson Ranch Program EIR Mitigation with the terms of the Parkland Agreement and Robertson Ranch Program EIR Mitigation Measures. The project was described in the Program EIR for the Robertson Ranch Master Plan and the proposed activities will have no effects beyond those analyzed in the Program EIR.	NOD	
2005012018	Northeast Water Storage Reservoir Replacement Roseville, City of Rocklin--Placer The applicant is proposing to replace a six million gallon capacity (MG) seismically-deficient treated water storage reservoir with a new 7.25 MG replacement reservoir. The 7.25 MG replacement reservoir would be constructed adjacent to the existing 6 MG tank within the City of Roseville's Northeast Tank Facility. Although the facility site is owned by the City of Roseville, the site is located within the City of Rocklin's corporate boundaries, immediately adjacent to the Roseville corporate boundary. The replacement reservoir would be designed to meet current seismic codes. The height and volume of the new reservoir would be similar to that of the existing reservoir. Upon completion of the new tank, the existing tank would be demolished and removed.	NOD

2007018131	<p>Dam Assessment and Rehabilitation Projects Metropolitan Water District of Southern California --Los Angeles, Riverside, San Bernardino, Orange</p> <p>Metropolitan has a conveyance and distribution system that includes 26 dams and reservoirs that store treated and raw water, of which 21 are under the jurisdiction of the California Department of Safety of Dams (DSOD). As a responsible dam owner, Metropolitan regularly monitors and evaluates the performance of its dams. Consistent with industry practice, Metropolitan initiated the Dam Safety and Rehabilitation Program in 2004 to review the adequacy of Metropolitan's dams, evaluate risks, and identify alternative solutions to minimize risks. Metropolitan has authorized a Seismic Assessment Study to provide an overall evaluation of the seismic safety of Metropolitan's dams and appurtenant structures. This Seismic Assessment Study is being executed in four phases to provide a systematic, rational, and cost-effective assessment approach. Metropolitan has completed Phases 1 and 2 and determined that of the 26 dams, 11 dams would not be subject to seismic instability, and no further study or analysis is warranted. For the remaining 15 dams, additional specialized evaluations are recommended to assess their overall seismic safety. The assessment of 13 dams will be conducted under Phase 3 of the Seismic Assessment Study. The facilities to be assessed include Orange County, Live Oak, Palos Verdes, Garvey, Gene Wash, and Copper Basin reservoirs, the finished water reservoirs at Mills, Jensen, and Skinner treatment plants, Lake Mathews, and Lake Skinner. Several facilities have multiple dams at a single location. The remaining two dams are located at the Diemer Plant and are being evaluated under a separate capital program for that facility. Under the Phase 3 Study, additional information will be obtained through limited field and laboratory investigations, and simplified seismic analysis will be conducted. Visual observations of the existing riprap slope protection on the upstream face of the Owen Dam (West Dam) at Diamond Valley Lake has identified signs of shifting riprap under high wave/wind loads. While these conditions do not jeopardize the overall safety of the dam, if left unattended the</p>	NOE

	riprap will continue to shift, causing recurring maintenance and repair problems. Metropolitan proposes to perform a study to determine the best method of repair to prevent shifting of the riprap.		
2007018132	Middle Feeder South Periodic Shutdown Metropolitan Water District of Southern California Monterey Park, West Covina--Los Angeles Metropolitan proposes to shutdown and de-water the Middle Feeder to replace plug valves and ball valves. The valves are located in existing structures and no excavation or vegetation removal is required.	NOE	
2007018133	Joseph P. Jensen Water Treatment Plant Ground Fault Protection Upgrades - Final Design, Procurement and Construction and Administrative Building Seismic Upgrade Metropolitan Water District of Southern California Los Angeles, City of--Los Angeles Metropolitan proposes to upgrade the ground fault protection system on eight of nine original Unit Power Centers (UPCs) at the Jensen Plant. These nine UPCs were installed during the original Plant construction. The upgraded ground fault protection system will limit and contain ground faults and improve Plant reliability by reducing the possibility of Plant shutdowns caused by unintentional power outages. The ninth UPC is not critical and need not be upgraded at this time. Metropolitan is also proposing to conduct retrofit work that will include structural reinforcement of the Jensen Plant Administrative Building's concrete roof structure, including the clerestory that covers the entrance and lobby, and strengthening of the interior shear walls. The recommended structural reinforcements will allow the building to better withstand a major seismic event, thereby enhancing Plant reliability.	NOE	
2007018134	Joseph P. Jensen Water Treatment Plant Filters Nos. 1-20 Surface Wash System Upgrade - Preliminary Design Metropolitan Water District of Southern California Los Angeles, City of--Los Angeles Metropolitan's Jensen Plant has a total of 20 granular tri-media filters. Despite receiving routine maintenance, the existing steel surface wash header pipes and appurtenances at Filters Nos. 1-20 have deteriorated through continual use over their 30 years of operation. Metropolitan proposes to conduct backwash system upgrades, which include replacement of the corroded 15-inch diameter surface wash header pipes and conversion of Jensen Filters Nos. 1-20 to fixed nozzle surface wash systems. This project will make Filters Nos. 1-20 consistent with all other filters at Metropolitan's treatment plants.	NOE	
2007018135	Lease Agreement (R.L. 2480) with HayDay Farms, Inc. Metropolitan Water District of Southern California Unincorporated--Riverside, Imperial The Metropolitan Water District of Southern California proposes to enter into a farm lease (R.L. 2480) with HayDay Farms, Inc. for approximately 7,000 gross acres (6,598 water toll acres) designed as portions of MWD Parcel Nos. PVID-1-110 and PVID-1-130. The lease term would be five years, subject to a one-year termination clause that requires Metropolitan to compensate the tenant for existing long-term crops and, in return, Metropolitan would take ownership of those long-term crops. 2006081131	<p>Indio-Jackson Retail Center Indio, City of Indio--Riverside</p> <p>The 56-acre Indio Towne Center project as proposed will consist of development of a commercial-retail center with 8 major retail pads, and smaller pads for development of commercial shops, restaurants, banks and other retail uses. The proposed project construction consists of approximately 487,721 square feet of floor area along with associated parking and landscaped areas. The proposed project approvals will include a development agreement, design review permit, along with a tentative parcel map to subdivide the property, and a conditional use permit to allow the proposed retail uses within the City's Business Park land use district. The project would involve three construction phases: (1) site preparation, (2) building construction, and (3) paving. Construction is estimated to take 9 to 12 months from project approval and commencement of site preparation.</p>	NOD	
2006082126	<p>Investigation Area B.2 Remedial Action Plan Toxic Substances Control, Department of Vallejo--Solano</p> <p>Preparation and approval of the Remedial Action Plan (RAP) by DTSC is pursuant to the requirements of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), as amended by the Superfund Amendments and Reauthorization Act (SARA) of 1986; the National Oil and Hazardous Substances Pollution Contingency Plan (NCP) in Title 40 of the Code of Federal Regulations (CFR), Part 300; and Chapter 6.8, Division 20, California Health & Safety Code (H&SC). Remedial Action Plan will clean up contamination at an 83-acre portion of the former Mare Island Naval Shipyard. The area is referred to as Investigation Area B.2 (IA B.2) and is part of a larger parcel transferred from the Navy to Lennar Mare Island.</p>	NOD	
2006101038	<p>Albany Park School Expansion Project Delano Union School District Delano--Kern</p> <p>The proposed school expansion would require the reconfiguration and/or replacement of leased buildings with purchased buildings. Seven portable classrooms would be added, expanding the student capacity by 175 students; the schools' maximum student capacity would increase to 900 from 725. Approximately 15 staff would be added, increasing the number to 65/70 faculty and staff from the present number of 50/55. Improvements would be made to the curbs, streets, gutters, and parking lots as required; parking would be increased by 30 additional spaces.</p> <p>Nighttime lighting would be required for the parking lots and walkways, as the school would be used in the evenings for community meetings and parent/teacher meetings. No nighttime lighting would be required for the playfields. The playfield area would be enhanced to accommodate two baseball fields and hard court ball games. Busing would be provided for special education students; otherwise students would walk or bike or be transported to school by car. Construction is anticipated to begin during the first quarter of 2009. The school expansion would be built in one phase. Significant impacts were determined to occur relative to the following seven resource areas: aesthetic, agricultural resources, air quality, geology and soils, hydrology and water quality, noise, and public services. The proposed mitigation measures would reduce these significant impacts to less than significant.</p>	NOD

2006111075	<p>Oleander Pump Station Transmission Pipelines Eastern Municipal Water District Perris--Riverside</p> <p>EMWD intends to construct approximately 6,000 lineal feet of 60-inch diameter pipeline to connect its Oleander Pump Station to its 1627 pressure zone and approximately 6,600 lineal feet of 36-inch diameter pipeline to connect its Oleander Pump Station to its 1705 pressure zone in an unincorporated area of Riverside County. The Oleander Pump Station, located north of the intersection of Oleander Avenue and Western Way within the City of Perris, is a part of the Perris Valley Pipeline project to convey potable water from the Metropolitan Water District of Southern California's Mills Water Treatment Plant to EMWD's service area. However, in order to convey potable water from the pump station to EMWD's service area, it is necessary to construct the two 24-inch pipelines. Upon completion, one pipeline would serve the 1627 pressure zone (east of I-215) and the pipeline would serve the 1705 pressure zone (west of I-215) thereby providing reliable, efficient water service to existing customers.</p>	NOD	
2006112107	<p>McEvoy Design Review Marin County Novato, Petaluma--Marin</p> <p>The currently proposed project is for the construction of an approximately 250-kW wind energy conversion system for the generation of electricity. The proposed wind energy conversion system (WECS) consists of approximately 138-foot tall tubular tower with a 14-foot diameter base mounted with a Furlander FL250 wind turbine or equivalent wind turbine. The Furlander FL250 wind turbine rotor has a radius of 52 feet resulting in a maximum WECS height of approximately 189 feet. The project includes the installation of an underground 6-inch, 12k volt power line delivering electricity generated from the windmill to an existing transformer station. The project also includes improvements to an existing roadway for regular maintenance activities, and construction of a roadway extension to access the project site for purposes of erecting the WECS.</p>	NOD	
2006122015	<p>Galt Wastewater Treatment Plant Outfall and Effluent Flow Meter Project Galt, City of Galt--Sacramento</p> <p>The proposed project would replace and extend an existing outfall near the location of the proposed effluent meter in order to avoid installing two different meters. Currently, two outfalls discharge water from the City of Galt storage reservoir into an unnamed seasonal drainage, which flows into Laguna Creek. One of the outfalls delivers water from the cascade aerator. The other outfall is a drain directly from the reservoir, used when the water level in the reservoir falls below the level of the cascade aerator. An 8-foot separation exists between the two outfall structures. In order to accurately meter the flow from both outfalls, the two pipelines would be connected with a "T" within a new catch basin structure, and a 16-inch diameter pipeline would be extended about 31 feet into the unnamed seasonal drainage. The flow meter would be installed about 6 feet "downstream" from the catch basin, and an elevation head would be constructed on the far side of the flow meter in order to keep the meter constantly full to provide accurate measurements. From that point, the pipeline would extend another 30 feet, for a total of about 61 feet of pipeline, to its point of final discharge to the seasonal drainage. The pipeline extension would involve pouring a 6-foot wide concrete apron in the existing drainage swale to support the weight of the catch basin, meter, and elevation head. The concrete apron would have 3-foot</p>	NOD

2003071024	Tentative Tract Map 16603 (2nd Extension of Time) Adelanto, City of Adelanto--San Bernardino Request for the 2nd Extension of Time of an approved Tentative Tract Map to subdivide 17.34 acres into 66 single family lots in an R-1 (Single Family Residential) zone with a new expiration date of August 5, 2007.	NOE	
2005078415	Millerton Lake-South Shore Kiosk Replacement Boating and Waterways, Department of --Fresno This is a revised version from the original notice of filed July 25, 2005. Replacement of the entry kiosk and roadway upgrades remain a part of the project. However, during project planning it was recognized that the septic system required replacement. Therefore, this project will replace the South Shore entry kiosk and upgrade the roadway leading to the parking area. The existing kiosk is approximately 40 years old and the road is too narrow for the larger vehicles in use today. The project will also replace the existing septic system, including the leach field. The location will be slightly different than the current location to ensure public health and safety. This project would provide the Department of Parks and Recreation with a safer and more efficient area for admitting users to the boat launch area.	NOE	
2007018154	Expansion of East and West Block Building Rotundas for Health Care Services Corrections and Rehabilitation, Department of --Marin The proposed project would remove existing substandard conditions within the rotunda structures of the East and West Block buildings for the purpose of providing 250 square feet of health services clinic space at each location. In addition, a 300 square foot one-story addition would be constructed and attached to each rotunda. These health care improvements are being designed and will be managed by the California Prison Health Care Receivership Corporation. All work will be designed to be consistent with the general architecture of the adjacent existing structures. The proposed construction project will be done in a manner	NOE

	consistent with the Secretary of the Interior's Standards for the Treatment of Historic Properties.		
2007018155	Resurfacing, Restoration, and Rehabilitation Caltrans #1 Rio Dell--Humboldt The proposed project is a resurfacing, restoration, and rehabilitation project. It will include an AC overlay of the entire project, which will result in existing AC dikes being replace and brought to standard height. At the southbound Rio Dell/Scotia on-ramp (PM R51.75), approximately 150 feet of slope will be reconstructed with rock slope protection (RSP). Work will also include the repair of culverts at 21 locations. Eleven of those locations have sensitive resources that will require minimization efforts to reduce impacts to the surrounding environment. Rumble strips will be placed at locations where space allows for the safe passage of bicycle traffic. Light upgrades will also occur at three interchange locations (PM R51.83 North Scotia Separation, PM R52.60 Davis St. OC, PM R52.38 Scenic Way UC).	NOE	
2007018156	Floriston Storm Damage Caltrans #3 --El Dorado Caltrans proposes to connect several sections of storm damage on NEV-80. Reconstructing shoulders, removing slide material, re-grading ditches, repairing drainage elements and replacing rock fall fence at four locations. Clearing culverts and shoulders is necessary for proper drainage to protect the road from any further structural damage and keeping the riding surface clear and safe. No bridge work.	NOE	
2007018157	Minor Additions to Los Peñasquitos Elementary School Poway Unified School District San Diego--San Diego The Poway Unified School District is proposing minor additions to Los Peñasquitos Elementary School located within a developed neighborhood in the City of San Diego. The proposed project would occur within the confines of the existing elementary school campus and would entail the following projects: <ul style="list-style-type: none"> - Replace three existing portable classroom buildings, - Update restrooms to comply with ADA, - Construct two kindergarten classrooms, - Renovate administration and library spaces, - Install new low voltage systems throughout the campus, - Install new electrical distribution system, - Interior and exterior paint, and - Construct a new kitchen and covered lunch shelter. <p>The proposed improvements would not increase the number of teaching stations or the enrollment capacity of the school. Rather, they would upgrade disabled persons access and provide better and safer instructional facilities for students and staff.</p>	NOE

2007011112	Initial Study/Mitigated Negative Declaration College of the Sequoias Nursing and Allied Health Center College of the Sequoias Visalia--Tulare The proposed project will relocate the Allied Health programs (currently in portables) to the proposed Nursing and Allied Health Center. The building will provide an additional 11,820 assignable square feet and will be constructed at the site of the current Life Science building that will be demolished. The project will provide additional required space for the planned growth of the Allied Health programs. The proposed project is projected to increase enrollment in these programs from approximately 285 students to 620 students (an increase of approximately 335 students).	Neg	02/23/2007
2007011116	San Joaquin Marsh Campus Project Irvine Ranch Water District Irvine--Orange Construction of the Marsh Campus improvements include the re-configuration of three historical houses, construction of an "open air" classroom and storage area, improvements to the campus landscape, and improvements to the drop-off area. Re-landscaping of the "meadows"/picnic area, would include relocation of the picnic area to the meadow area and creation of a path that provides access around the entire "meadow" and connects to the new historic home configuration. In addition, the project would include expansion/upgrading of the interim parking lot into a more formal, finished parking lot. This parking lot would include a walkway with a scenic overlook from the parking facility to the Marsh Campus. Finally, the existing storm water pump station would be enlarged and upgraded to handle a 100 year storm event. The proposed renovated pump station will include a below grade concrete structure for collecting storm water and submersible pumps for transferring the water to an adjacent pond.	Neg	02/26/2007
2007012100	Parcel Map #06-44, Scott Weston Tehama County Planning Department Corning--Tehama To create four parcels of 2.00 acres each and a remainder parcel of 2.00 in an R1-A-MH-B:86; One-Family Residential-Special Animal Combining District-Special Mobilehome Combining District-Special Building Site Combining (86,000 sq. ft.) 2 acre Minimum Zoning District. The project is located east of Corning on the south side of Connecticut Avenue, approximately 660 feet west of the Illinois Avenue/Connecticut Avenue intersection.	Neg	02/23/2007

2007018192	<p>Growlersburg Conservation Camp Sewage Plant Retrofit Forestry and Fire Protection, Department of --El Dorado</p> <p>The California Department of Forestry & Fire Protection proposes retrofit of an existing sewage treatment system at the Growlersburg Conservation Camp in order to increase its capacity and bring the system into compliance with state law. In order to accomplish this, the project proponent proposes to install a new lift station with grinder pumps upstream, but in very close proximity to the existing septic tank. Waste will then be diverted to a new wastewater treatment plant which will be placed on top of a concrete slab. Upon leaving the wastewater treatment plant the effluent will be chlorinated and sent to existing ponds for storage. When weather conditions permit this effluent shall be chlorinated again and pumped from the ponds to the two existing spray fields. Twenty-two additional sprinkler heads will be installed within the existing two spray field which will then be partitioned into two parts each by installing earth berms for a total of 4 spray fields. The overall spray field area will not change.</p> <p>The existing septic tank will remain on line, so that the sludge waste from the treatment plant may be pumped to this tank. In the event of a treatment plant failure, the camp waste may be diverted to a new above ground 8 foot high and 26 foot diameter, 30,000 gallon steel bolted tank where wastewater can be stored until the system is repaired and comes back on line at which time the waste in this tank will be processed through the treatment plant, then sent to the ponds. The new 30,000 gallon tank will be located below the ball field, at the end near where the treatment plant is shown. New piping is to be installed in new trenches that are to be dug approximately 30 inches deep and 24 inches wide.</p> <p>The new components of this project are the lift station, wastewater treatment plant and associated concrete slab, 30,000 gallon tank, 22 additional sprinkler heads, and piping that connects them.</p>	NOE	
2007018193	<p>Four Portable/Modular Buildings at Marina Campus Monterey Peninsula Community College District Marina--Monterey</p> <p>The project consists of four modular buildings and parking at MPC's property located at 12th Street and 3rd Avenue: two 24-foot by 38-foot classrooms, one 24-foot by 38-foot office building, and one 12-foot by 40-foot modular bathroom. The classrooms have a capacity of 32 students each plus two teachers. One office staff person is planned. MPC currently runs this program at the UC-MBEST center near the Marina airport. Average class size is 12 students.</p>	NOE

2007011115	El Camino Real Widening Carlsbad, City of Carlsbad--San Diego City project to remove existing temporary street improvements and install permanent street and sidewalk improvements along a 280-foot long stretch of El Camino Real, just northwest of Cougar Drive. Project would also grade a steep slope to achieve a suitable street grade and an adjacent 2:1 landscaped slope. The project has a total area of approximately 0.20 acre. Most improvements proposed, such as the widening and sidewalk, would occur where the existing steep slope would be removed, an area about 110 feet long. Planned construction would transition on each end to existing, fully improved portions of El Camino Real.	MND	02/26/2007
2007011117	Tank Farm Gravity Sewer, Lift Station and Force Main Project (ER 150-06) San Luis Obispo, City of San Luis Obispo--San Luis Obispo Decommissioning of existing sewer collection system and installation of new gravity sewer, force main, and lift station.	MND	02/26/2007
2007011118	Tentative Tract Map No. 33898 & Change of Zone No. 7311 Riverside County Planning Department --Riverside Change of Zone No. 7311 proposes to change the project's site current zoning classification from Rural Residential (R-R) to Residential Agriculture (R-A) for a consistency zone classification. Tentative Tract Map No. 33898 proposes a schedule B subdivision of 12.45 gross acres into 19 residential lots with a minimum lot size of 21,780 sq. ft. and one water quality basin lot.	MND	02/26/2007
2007011119	San Luis Creek Retaining Wall Replacement Project (ER 46-06) San Luis Obispo, City of San Luis Obispo--San Luis Obispo Removal of portions of a failed retaining wall that has fallen into the creek, and replacement of the failed wall with a new retaining wall. The project also includes restoration and minor expansion of a parking lot beyond an existing curb at the edge of the existing paving. In 2005, the concrete retaining wall was undermined and collapsed as a result of heavy creek flow during winter storms. The project involves installing sheet pile in the same location and alignment of the collapsed concrete wall to prevent further bank erosion, and backfilling the area behind the sheet pile wall. To execute removal of the failed concrete wall which is now within the creek channel, "hand" tools such as a wall saw unit and/or jackhammers would be used to break portions of the failed wall into a few smaller pieces. Then, the smaller pieces of the collapsed wall would be excavated with a crane situated from the top of bank.	MND	02/26/2007

2007011122	Kern County Water Agency Improvement District No. 4 Cross River Pipeline Kern County Water Agency Bakersfield--Kern The Kern County Water Agency Improvement District No. 4 (District) proposes to construct a 0.4 mile long, 72-inch diameter water conveyance pipeline. The pipeline will convey raw water from the Carrier Canal to the Henry C. Garnett Water Purification Plant (HCGWPP) for treatment to meet urban water supply demands within the District service area.	MND	02/26/2007
2007012107	Fremont Unified School District M.V.R.O.P. Campus at Kennedy High School Fremont Unified School District Fremont--Alameda The MVROP, with approval and oversight by the FUSD, is proposing to construct and operate the educational facility planned for grade levels 9 through 12, including adults with an enrollment capacity of 513 students, with a future Master Plan site capacity of 729 students. Construction and operation of the new MVROP facilities would be the responsibility of the FUSD. The construction of the project is currently underway and is expected to be completed in May 2007. The facilities would be located on the southern end of the existing Campus on Blacow Road and Stevenson Boulevard. The total interior building area would be 47,284 square feet (sf). Facility buildings would include 26,390 sf of teaching spaces (19 teaching stations), including classrooms, storage, and offices.	MND	02/26/2007
2007012108	Pajaro Basin Freshwater Wetland Santa Clara Valley Water District Gilroy--Santa Clara The project would provide 9 acres of freshwater wetland habitat to compensate for impacts from the District's Multi-year Stream Maintenance Program.	MND	02/26/2007
2007012113	North Auburn Highway 49 Transmission Main Project Nevada County Irrigation District Auburn--Placer The purpose of the proposed new water transmission main would be to provide an inter-tie between several of the District's existing water distribution system loops to provide the desired flow capacity improvements. The project includes the construction of approximately 4,350 feet of 16-inch nominal inside diameter water pipeline along Highway 49 north of the City of Auburn in Placer County. The project consists of two separate reaches. Reach 1 consists of approximately 1,150 feet of new pipeline connecting an existing pipeline located near Locksley Lane and Highway 49, to an existing pipeline new the intersection of Quartz Drive and Highway 49. Reach 2 consists of approximately 3,200 feet of new 16-inch nominal inside diameter pipeline that begins just north of Education Street on the west side of Highway 49 and ends at Cottage Drive.	MND	02/27/2007
2007012114	Wildflower Santa Rosa, City of Santa Rosa--Sonoma The project consists of a Subdivision application to rezone two parcels totaling 3.47 acres from OSC to R-1-6. The applicant also proposes to subdivide the property into 26 lots for single-family residential development. The project would obtain access from an extension of Peterson Lane and Dancing Penny north, into the project site, along with an extension of Orleans Street easterly. Dancing Penny would be partially constructed off of the project site. City sewer and water services are proposed. Existing structures on the project site would be	MND	02/27/2007

1998041022	<p>Pier S Marine Terminal and Back Improvements Long Beach, Port of Long Beach--Los Angeles</p> <p>The proposed project would construct a 160-acre marine terminal on Pier S. Dredge and fill activities would involve dike realignment, berth deepening, wharf construction, and channel widening. Construction of the wharf would include excavation of the existing shoreline to straighten the shoreline and widen the Cerritos Channel between the Pier A and future Pier S pier head lines to accommodate the passage of modern container vessels through the channel. Widening of the Cerritos Channel would create approximately 10.3 acres of new water surface area. Wharf excavation would include removing approximately 1,500,000 cubic yards of material and reconstructing the shoreline with imported quarry run and armor rock. In addition to wharf excavation, approximately 600,000 cubic yards of material that may or may not be suitable for unconfined aquatic disposal would be dredged from the Cerritos Channel for ship berthing. Dredging of the Back Channel would be conducted to extend the navigable width of the channel to approximately 315 feet at the full dredge depth. Approximately 250,000 cy of material below MLLW (including materials that are either suitable or unsuitable for open ocean disposal) would be dredged from designated side walls of the Back Channel and Inner Harbor Turning Basin at the intersection of the Back and Cerritos channels to facilitate the navigation of ships expected to serve Piers A, B, C, and S. The minimum and maximum dredge depths in the Cerritos Channel, Back Channel, and Inner Harbor Turning Basin would be -52 feet MLLW and -54 feet MLLW, respectively. The maximum dredge depth of -54 feet MLLW includes a 2-foot allowance over the target depth of -52 feet MLLW. The terminal would include buildings, facilities, truck gates and other structures needed to support container terminal operations and administration. The terminal would include an intermodal rail yard facility consisting of eight tracks.</p>	NOP	03/14/2007

2007012109	<p>178 Townsend Street Project San Francisco, City and County of San Francisco--San Francisco</p> <p>The project site is at 178 Townsend Street, on the corner of Townsend Street and Clarence Place between Second Street and Third Street. The site is zoned SLI (Service/Light Industrial), is in a 50-X Height and Bulk District, and is occupied by the California Electric Light Company Station B building, a Contributory Building within the South End Historic District. The Project Sponsor proposes to preserve and convert the building from its current use as a valet parking garage to a mix of ground-floor retail and up to 85 housing units, with accessory off-street parking for the residential uses. The existing corrugated steel roof, which has been determined to be non-historic, would be removed to accommodate the project. The proposed uses would be housed in an approximately 5-story building totaling approximately 86,000 gross square feet (gsf), with 62,000 gsf in residential uses and 2,350 gsf in retail uses as well as parking space, open space, common area, and building service space. The proposed structure would be contained within the walls of the existing structure and would be set back 40 feet from Townsend Street. The new building would rise above the existing 23- to 42-foot tall roofline to a height of 50 feet. The ground floor level would include a publicly-accessible courtyard located immediately behind the walls of the Townsend Street facade and lined with two small retail spaces. A one-level, 13,200-gsf, underground parking garage within 74 parking spaces in two-car stackers, accessed from Clarence Place, would be provided for use by residents. The project would require a Conditional Use authorization, variance approval, and a Certificate of Appropriateness for alterations to a Contributory Building within the South End Historic District.</p>	NOP	02/26/2007

1995081014	Starwood Development Wastewater Pump Station San Diego County Department of Planning and Land Use Unincorporated--SAN DIEGO The applicant proposes to alter the streambed of three agriculture reservoirs and one detention basin within two unnamed streambeds, tributaries to the San Dieguito River, to accommodate construction of the Rancho Santa Fe Lakes Project. The project includes dewatering of Reservoirs A, B, and C to allow dam stabilization. Clean fill will then be added to the reservoir bottoms to reduce their capacities by reducing their depth from approximately 15 feet to eight feet. The detention basin will be converted to a managed lake. The project also includes on-site wetland restoration. SAA# 1600-2006-0143-R5	NOD	
2003021141	General Plan Amendment/Zone Change (PA 01-114) (aka: The Ranch Plan) Orange County --Orange The California Department of Fish and Game is issuing an Agreement regarding the Stream or Lake Alteration to the project applicant, Laura Coley-Eisenberg, representing Rancho Mission Viejo Community Development. The applicant proposes to alter the streambed of twelve unnamed tributaries to San Juan Creek to accommodate the development of Planning Area 1 within the Rancho Mission Viejo "Ranch Plan" Project. Project activity includes grading and fill for the following elements: (1) development of approximately 488 acres of residential buildings; (2) development of 84 acres of urban activity center which includes internal roadways (Cow Camp Road), local streets, residential development, retail/commercial development, community facilities including a wellness center, parks, trails, community facilities, and a fire station; (3) extension of the existing regional riding and hiking trail along the southerly side of San Juan Creek, and the regional bikeway along the northerly side of the Creek; (4) widening of Antonio Parkway from four to six lanes, including the existing bridge where Antonio Parkway crosses San Juan Creek; (5) widening of Ortega Highway from two to four lanes, including the existing bridge where Ortega Highway crosses San Juan Creek; (6) installation of associated infrastructure such as drainage outfalls, water quality treatment facilities, water and sewer lines; (7) geotechnical investigations related to the development of activities or infrastructure described above; and (8) installation of temporary catchment basins within CDFG jurisdiction for creek diversion during construction associated with the widening of the Antonio Parkway Bridge and/or the Ortega Highway Bridge. Temporary silt catchment basins shall be limited to areas already identified for temporary impacts. SAA# 1600-2006-0178-R5	NOD

	front yard setback for the placement of residences closer the new roadway, minimizing the amount of grading required.		
2006112116	Calaveras County Water District La Contenta Wastewater Treatment Plant Phase 2 - Effluent Disposal Spray Field (CIP Project No. 15027) Calaveras County Water District --Calaveras Development/construction of a new effluent (recycled water) disposal spray field for CCWD's LaContenta Wastewater Treatment Plant, including pumping, piping, and irrigation facilities, to match the current storage and treatment capacity.	NOD	
2007029010	U.S. Bureau of Reclamation's Water Right Petition to the State Water Resources Control Board Requesting the Addition of 2,170 Acres to the Authorized Place of U Fresno County --Fresno, Madera The USBR holds one water right License and three water right Permits associated with the Friant diversion of the CVP (License 1986, Permits 11886 and 11887). The authorized place of use for License 1986 and Permit 11886 does not include municipal use as an authorized purpose of use. Permit 11887 includes municipal use as an authorized purpose of use; consequently, the USBR's petition is to add 2,170 acres to the authorized place of use for Permit 11887 and within this expanded place of use will allow municipal use as a purpose of use. USBR has stated that the expansion of the place of use to include the 2,170 acres will not result in any increase in the volume in total diversions from the San Joaquin River and will not result in changes to the Friant operations under License 1986 and Permits 11886 and 11887.	NOD	
2007018194	Owl's Nest, Morales, Dairy, & Victorine House Repair Parks and Recreation, Department of Carmel--Monterey Project involves the following maintenance and repair on the Owl's Nest, Morales, Dairy, & Victorine houses at Point Lobos Ranch: (1) replace windows as necessary due to extensive dry rot; (2) tent the houses for the purpose of termite extermination; (3) check the structures for electrical defects and repair any minor problems; (4) replace the cabinets, bathtubs, and toilets; install new subfloor, wall and floor tiles in the bathrooms; (5) replace sinks and countertops in kitchens; (6) check fireplaces, if present, and perform necessary maintenance; (7) check wall soundness and reinforce and/or rebuild as necessary; (8) replace linoleum flooring in kitchens and dining rooms, as necessary; (9) perform necessary repairs on the porches; (10) close off the footing of the houses to deter animals from entering; (11) assess and correct mold and mildew problems to the extent possible; (12) paint the interior and exterior of the houses; and (13) remove and dispose of three sheds near the houses. All replacement of historic fabric and character-defining features will be done in like-kind (reusing materials from the structure or very similar materials in a similar fashion). All buildings will be thoroughly recorded prior to commencement of work. In the event that previously undocumented cultural resources are encountered during project construction (including but not limited to dark soil containing shellfish, bone, flaked stone, groundstone, or deposits of historic trash), work within the immediate vicinity of the find will be temporarily halted or diverted until a DPR-qualified cultural resource specialist has evaluated the find and implemented appropriate treatment and disposition of the artifact(s). All work will comply with the latest addition of the California Code of Regulations, the State Historical Building Code, and the Secretary of the Interior's Standards for the Treatment of Historic Properties. 	Merced and the County of Merced were included in the analysis process. The Castle AFB Reuse Plan and Local Agency Military Base Recovery Area Final EIR (CAFBRP and LAMBRA FEIR) were certified in 1996.		
2007011125	Wyndham Boutique Hotel/High-Rise Residential Project Costa Mesa, City of Costa Mesa--Orange Makar Bay North Costa Mesa, LLC is proposing major redevelopment of the existing Wyndham Hotel property for the development of a mixed-use project, including a boutique hotel (~ 200 rooms), high-rise residential tower (~ 120 units), and a parking structure on a 3.0 acre parcel located at 3350 Avenue of the Arts.	NOP	02/27/2007
2007011129	45 Unit Affordable Housing Development Claremont, City of Claremont--Los Angeles The project entails the construction of a 45 unit multi-family housing development for low and very low-income residents on 2.6 acres on Base Line Road approximately 1000 feet east of Towne Avenue.	NOP	02/27/2007
2006122036	Use Permit Application No. 2006-36 - Fiscalini Cheese Co. Stanislaus County Modesto--Stanislaus Request to relocate and expand an existing farmstead cheese processing facility on a 38 acre parcel. The new facility will consist of an 81,800 square foot building designed to provide a visitor's center, processing and packaging rooms, cheese storage, and an equipment room. The building footprint will be 45,100 square feet. A depressed loading dock will be added to the eastern section of the building. The applicant is proposing to conduct tours of the facility to educate professional and public officials about the cheese making process as well as innovations and conservation methods available to the dairy industry. Tours are not expected to exceed two per day, Monday thru Friday, during normal business hours. The visitor center will include a research and development kitchen and 3,500 square foot retail store. Retail items are limited to Fiscalini cheese, locally grown processed food items (25%), and promotional non-food items intended to educate the public and advance agricultural sales (5%).	Neg	02/27/2007
2007011126	General Plan Amendment 06-05, Zone Change 05-10, Location and Development Plan 06-06 Adelanto, City of Adelanto--San Bernardino The applicant, Juan Camarena, requests a General Plan Amendment and Zone Change from Single Family Residential (R1) to General Commercial (C), to demolish an existing 1,350 square foot building and replace with a new 900 square foot office building, add paved parking areas, and utilize one acre of the site area for storage, display and sale of masonry products, located on the west side of Adelanto Road approximately 280 feet north of Bartlett Avenue. 2007012111	Dixie Creek Restoration Project Plumas County Planning & Building Services --Plumas Elimination of 2,000 linear feet of degraded and entrenched stream channel to restore the functionality of 12 acres of floodplain.	Neg	02/27/2007
2007012112	Gordon Huether Art Gallery (Use Permit #P06-01458-UP and Ordinance Amendment #P06-01529-ORD) Napa County Conservation Development & Planning Department Napa--Napa The proposal would amend Section 18.28.030 of the Napa County Code to allow "art studios and galleries" as a new land use permitted upon grant of a use permit in a CL (Commercial Limited) zoning district. The concurrent use permit application (upon adoption and approval of the zoning ordinance amendment) would allow an art studio and gallery use in an existing, approximately 8,920 square foot building.	Neg	02/27/2007
2007012115	San Francisquito Creek Pump Station Installation Project Palo Alto, City of Palo Alto--Santa Clara The project includes the construction of a new pump station to convey storm water to San Francisquito Creek from an existing 96"-diameter storm drain serving northeast Palo Alto. The pump station will deliver up to 300 cubic feet per second of storm water to the creek when high creek levels would otherwise preclude the storm drain from emptying. Project elements include construction of a new 8' x 8' box culvert from the existing storm drain outfall to the pump station, a pump station building (consisting of an underground sump, pumps, and a control building housing electrical equipment and a standby emergency generator), and a natural vegetated channel to convey pumped storm water discharge to the creek. The facility will be built on an easement granted to the City of Palo Alto by the Santa Clara Valley Water District.	Neg	02/28/2007
1998121047	Amendment to Long-Range Development Plan Santa Barbara Community College District Santa Barbara--Santa Barbara Construct the 60,523 sq. ft. SoMA Building directly east of the existing Student Center on the SBCC East Campus. The Building will exclusively accommodate existing on-campus College programs that are currently operating with insufficient classrooms and laboratories (such as portables), due to space limitations and /or outdated facilities. As a result of consolidating existing programs in the SoMA building, five portable buildings will be removed from the campus. (These structures will be maintained on campus in the short-term for use as temporary spaces for programs needing to relocate during other interior remodelling projects.) No backfill of existing on-campus educational program space relocating to the SoMA Building will occur, as the existing space vacated will be made available for remaining departments to expand and take advantage of upgraded facilities.	Oth

	Improvements Project 2007 is intended to comply with the current and anticipated Water Discharge Requirements (WDRs) issued by the Central Valley Regional Water Quality Control Board (RWQCB); to site and operate new facilities to minimize adverse environmental effect; to maximize operational flexibility, reliability, efficiency and safety; and to achieve the above objectives in a cost-effective manner that limits system capital costs, operation and maintenance costs, and user rates to the extent possible. Construction for the proposed project is expected to take approximately 21 months, and begin in June 2007 and be completed by February 2008. On a daily basis construction would typically take place during weekdays usually between the hours of 6:00 am and 5:00 pm. The WPCF is expected to be fully operational during construction. Construction work for the proposed project would be performed by a contractor(s) selected by the City of Lodi. Types of construction activity typically involved with the proposed project would include earthwork, structural steel and reinforced concrete work, electrical/instrumentation work, and installation of mechanical equipment and piping.		
2007011136	Palomar Community College - North Education Center, Facilities Master Plan Palomar Community College District Fallbrook--San Diego The project proposes development of a new Community College campus to serve the Northern San Diego County area. The project site is approximately 85 acres of (presently) undeveloped land, generally located east of Interstate 15, between Pala Road/State Route 76 and Pala Mesa Heights Drive, in the Fallbrook area. Proposed land uses would include parking, classroom and administration buildings, open space, and athletic fields. Facilities anticipated would include instructional space, administrative services, a library, offices, a student services center, food services, maintenance/operations, and other support services. The following provides a summary of facilities, as given in the Palomar Community College District Master Plan 2022 (August 2003).	NOP	02/28/2007

2007012119	Clear Creek Wastewater Treatment Plant Rehabilitation and Expansion Project Redding, City of Redding--Shasta The proposed project will rehabilitate existing facilities and expand the treatment capacity of the Clear Creek Wastewater Treatment Plant to accommodate future wastewater flows. The improvements will provide an additional 0.6 million gallons per day of average dry weather flow and 23.8 mgd of average wet weather flow. The increase in capacity will reduce the potential for overflow of untreated or partially treated wastewater into the Sacramento River during severe storm events.	Neg	02/28/2007
2007012120	Triton Naturals Use Permit Napa, City of Napa--Napa Request for a Use Permit and a Design Review Permit to establish a well site for commercial extraction of mineral water at 920 Anselmo Court, City of Napa. Site improvements will be limited to the well, well house enclosure, and truck access drive/staging area on the west side of the property. The water will be trucked off-site for bottling. A maximum of twenty 6,000 gallon truckloads of water would be extracted from the site per day. This equates to an annual water extraction of approximately 140 acre feet of groundwater per year. 2005092025	<p>Branciforte Creek Residential Santa Cruz, City of Santa Cruz--Santa Cruz</p> <p>The project consists of a Planned Development, Tentative Subdivision Map, and Design Permit application for creation of 44 lots and development of 37 residential units. Six lots will be sold, but no development plans are included in this proposal for these six lots (Lots 38-43). Access to the project site will be provided via new roadway that will cross the site and provide access off of Market Street and off Isbel Drive.</p>	Oth	
1993011028	<p>Emergency Storage Project Lake Hodges Pump Station San Diego County Water Authority</p> <p>The Supplemental EIR analyzes the infeasibility and deletion of a portion of previously adopted Emergency Storage Project Mitigation Measure R-8, which would have been established a temporary replacement trail segment for a Coast to Crest Trail segment that has been temporarily closed during construction of the pump station. There was no feasible environmental and timing constraints.</p>	NOD	
1995081014	<p>Starwood Development Wastewater Pump Station San Diego County Department of Planning and Land Use Unincorporated--SAN DIEGO</p> <p>The Operator proposes to alter 0.64 acre of streambed and floodplain of the San Dieguito River to accommodate the construction of the Del Dios Gorge Trail Segment of the JPA Coast-to-Crest Trail. Project activity includes construction of a 12-foot wide, 180-foot long steel fabricated bridge. Concrete bridge abutments will be constructed on both ends of the bridge for support. A temporary 20-foot wide, by 350-foot long access road and 20-foot by 150-foot staging area will also be constructed. The trail segment is 8-feet wide and will be either dirt or decomposed granite. The access road, staging area and bridge construction is scheduled for January 1st to March 15th, and because raptors are in the project area, preconstruction surveys will be carried out prior to vegetation removal. Trail construction (which impacts coastal sage) is scheduled to occur between September 15th and March 15th. SAA# 1600-2006-0300-R5</p>	NOD

2006041050	Los Angeles River Revitalization Master Plan Programmatic EIR/EIS Los Angeles, City of --Los Angeles The Los Angeles River Revitalization Master Plan is a blueprint for implementing a variety of greening projects, including the development of parks and open space, pedestrian and bicycle trails, bridges, enhanced connector streets, channel modifications, revitalized riverfront communities in key opportunity areas and a River Improvement Overlay (RIO) district along the 32-mile stretch of the River within the City of Los Angeles. Implementing the LARRMP recommendations over the near-term planning period (5 to 20 years) and the long-term planning period (20 to 50 years) constitutes the proposed action evaluated in the PEIR/PEIS. The general project area includes approximately one-half mile on each side of the 32-mile River corridor that begins near Owensmouth Avenue in Canoga and continues downstream to Washington Boulevard, near the northern boundary of the city of Vernon. The Plan intends to revitalize the general environment of the Los Angeles River by providing improved natural habitat, economic values, and water quality, as well as recreation, and open space amenities. The Plan area includes several locations where the potential exists for restoring a more natural riverine environment along the River, while maintaining and improving levels of flood protection. Creation of treatment wetlands in and around the River, to treat storm flows and to restore missing linkages of fragmented habitat, would also be pursued through LARRMP projects. LARRMP purposes include the provision of improved public access in the River to the River and reinvestment in the urban system that results in economic growth.	EIR	03/16/2007
2007011142	TTM 34584 Corona, City of Corona--Riverside TTM 34584 is a tentative tract map application to subdivide 61.6 acres into 65 single family residential lots in the R-1-20 (Single Family Residential, minimum lot area of 20,000 square feet) zone located east of Laurel Canyon Road, north of Shadow Valley Drive. MND	03/01/2007
2007012132	Rancho Cotate High School Modernization Project Cotati-Rohnert Park Unified School District Rohnert Park--Sonoma The Cotati-Rohnert Park Unified School District adopted a Master Plan that would guide the construction of Phases 1 through 7 of the modernization of the Rancho Cotate High School. Phase 1 would include conversion of current auto shop to an auto body repair facility. Phase 2 would include construction of a new stadium to replace the existing stadium. The new stadium would include an all-weather running track, a synthetic turf athletic field, bleachers, concession stand, and bathroom facilities. Phase 3 would include construction of a 500-seat performing arts theatre, including dressing rooms; a stage set workshop, flyway and plaza. Phase 4 would construct a new gymnasium which will include a regulation sized basketball court, bleachers, and a photovoltaic system. In addition to the new gymnasium, Phase 4 would include construction of outdoor tennis courts, baseball fields, a softball field, and a maintenance shed. Phase 5 would include construction of a gymnasium addition including locker rooms and an additional basketball court. Phase 6 would include building and infrastructure improvements throughout the campus. Phase 7 would include demolition of the existing gymnasiums and construction of a new covered lunch area. The project is not expected to result in an increase in enrollment.	MND	03/01/2007
2007011141	Laing Urban Residential Project Rolling Hills Estates, City of Rolling Hills Estates--Los Angeles The project consists of the demolition of existing office buildings and construction of a mixed-use commercial/residential development on the approximately 8.07 acre property. The project would include 163 residential units, 14,200 square feet of residential use, and associated parking.	NOP	03/01/2007

One modification to the existing MUP is proposed: (1) the relocation of existing recreational fields/facilities and addition of a new swimming pool to an existing orchard at the northern portion of the active campus.	NOD	
2006112106	Fish Screen Project Patterson Irrigation District Patterson--Stanislaus The proposed project consists of constructing a screened diversion to comply with the CDFG and the NOAA Fisheries fish screen design criteria.	NOD	
2007018232	Adoption of Final Site Cleanup Requirements for the Property Referred to as Hookston Station and Located at 228 Hookston Road, Pleasant Hill, Contra Costa Count Regional Water Quality Control Board, Region 2 (San Francisco Bay), Oakland Pleasant Hill--Contra Costa Adoption of final site cleanup requirements.	NOE	
2007018233	Lake Concow ADA Fishing Access Cleanup, 1600-2006-407-R2 Fish & Game #2 Oroville--Butte Remove invasive emergent aquatic vegetation and accumulated submerged debris from the area in front of the existing ADA fishing access ramp. The area is currently unusable. The lake level will be dropped to allow out of water access for cleaning. The soil surface will be scraped using a backhoe to remove all emergent and submerged vegetation before the lake level is raised to normal levels. If feasible, artificial, removable fish attracting substrate will be installed to serve to attract fish back to the area to provide enhanced fishing opportunities.	NOE	
2007018234	Environmental Review 2007-01, SAA# 1600-2006-0514-RS Fish & Game #2 --Glenn Removal of sediment from in and around bridges, culverts, storm drain outlets, and/or water; diversion inlets and stream channel bottoms; clearing trash and debris; removing fallen trees; removal of dead (not dormant) trees and shrubs; trimming of tree branches and limbs; removal of non-native vegetation with hand tools, heavy equipment, and chemicals; removal of emergent (e.g., bulrush and cattails) or other near water vegetation with hand tools, heavy equipment, and	NOE
